a good paper. however, it would be good to add on following data:

- a. a table on the association between socio-demographic data and serious complications eg toxoplasmosis, PCP, death etc vs mild complications eg dermatitis, gastritis etc
- b. possibly can add a pie chart or graph for interesting data eg complications, occupation of participants, etc rather than all data in tables
- c. an interesting and important table that can be added is the correlation between CD4 counts and death rates

Comments to the Author

Writing format (the use of small and capital letters as well as scientific names) need to be reviewed and corrected. The methodology found to be too simple; the case definition for each of the documented diseases was not explained. Scope of data and discussion are relevant to local utilisation.

Dear Editor-in-chief,

We are grateful to the editors and reviewers for the pleasure to accept my manuscript entitled "The Prevalence of Candidiasis Oris, Tuberculosis, and Anemia in Hospitalized HIV Patients Admitted in Dr. Soetomo General Hospital, Surabaya, Indonesia" in its current form for publication in the Malaysian Journal of Medicine & Health Sciences.

I have some questions about the publication process. In the author center I see awaiting production checklist, what must I prepare for the production checklist, and is there any publication fee? And the last can I get a Letter of Acceptance (LOA) for my manuscript that mentions the date of my manuscript being published?

Once again thank you for accepting my manuscript for publication in the Malaysian Journal of Medicine & Health Sciences.

Yours sincerely,

On behalf of the authors and co-authors

Feriawan Tan
