Referee's Comments

Thank you for studying this important area. it is a good study and large sample size. Higher level of the Statistical tool were used. However, I suggest to improve both basic and standard English and reanalyze the study by different age group of women in utilization of service which is more better.

Referee's Comments

Rephrasing of sentences in results is needed as there has been found repetition of some words and sentences that could be written concisely. Table titles needs preciseness and proper labelling. some unnecessary inclusion of results detail mentioned in discussion.
