Should the authors correct these points at the proofreading step:

-Abstract: Methods- 3rd statement - maternal marital - It should be written as maternal marital status

-Results: Last sentence- Should be: Moreover...mothers with a college education to have stunted children under two years (...).

-Conclusion: Last sentence should be written: The lower the mother's... chances of a mother having stunted children under two years.

-Page 6: Last line- Multivariate Analysis: Under two years of stunted growth (...)

-Page 7: First statement- Should be written as ...mothers having stunted children under two years.

-Second paragraph - same comment as previous.

-NOTE: Please check all phrases/statements written as - ...having children under two years stunted... should be written as ...having stunted children under two years. The way the statement was written seems not to convey sense of meaning. Kindly change to: ...having stunted children under two years.
