Manuscript Title: **A Review of Combing agents to carbon Dots for Enhancing Biomedical Applications**

Authors: Yaung - Kwee, Yaung - Kwee

Date: 2021-03-30

Dear **Mr. Yaung - Kwee**

Thank you for submitting the revised file of your manuscript to the **International Journal of Nanoscience and Nanotechnology**

The Editorial Office will proceed on your manuscript and inform you in the earliest time.

If there is anything else, please do not hesitate to contact us.

Truly yours,

Executive Managing Director of **International Journal of Nanoscience and Nanotechnology**

Subject: Manuscript Needs Major Revision (#IJNN-2103-2024 (R1))

To: <s.khanlawng@gmail.com>

Manuscript ID: IJNN-2103-2024

Manuscript Title: **A Review of Combing agents to carbon Dots for Enhancing Biomedical Applications**

Authors: Yaung - Kwee, Yaung - Kwee

Dear **Mr. Yaung - Kwee**

Your manuscript has obtained major revisions. In this case we normally treat it as unacceptable for publication. However, as numerous editorial errors have pointed out by the reviewers, the **International Journal of Nanoscience and Nanotechnology** editor believes that the manuscript could be rectified and prepare for possible publication.

Please let us know your views in this regard and in the case of positive response, reply us within 14 days time.

Truly yours,

Editorial Office of **International Journal of Nanoscience and Nanotechnology**

Dear Mr. Yaung - Kwee

Please, let me have the final version of the paper for further consideration. In order to ease the next step of revision, you are requested to highlight the amended parts on the original text and include a cover letter with clear responses to the comments given by the reviewer(s).

Reviewer comments:

_____ -

Reviewer 1:

Needs major revision. Should add more updated review, and papers in introduction section such as

1) Review on Carbon Dots and Their Applications 2) Carbon dots: synthesis, formation mechanism, fluorescence origin and sensing applications 3) Future Perspectives and Review on Organic Carbon Dots in Electronic Applications 4) Carbon dots: The

next generation platform for biomedical applications 5) Dendrimer functionalized carbon quantum dot for selective detection of breast cancer and gene therapy 6) Natural polysaccharide derived carbon dot based in situ facile green synthesis of silver nanoparticles: Synergistic effect on breast cancer and many more.....

TOC is very poor. Add more paper in the table. All images should be replaced with improved ones with better resolution and quality. There are lots of grammatical and typos error throughout the manuscript author should carefully check all these before submission after revised manuscript.

Reviewer 2:

Detailed comments are given below.

1. Using Carbon dots for biomedical applications is promising and has been well written in manuscript, but a discussion on cytotoxicity of these carbon dots inside a living cell would be necessary to complete the picture.
2. A comparison between conjugating selected agents with noble metal nanoparticles (Ag,Au) and carbon dots describing the advantages/disadvantages of both can be included in the manuscript.
3. The role of photoluminescence behaviour of Carbon dots in bio imaging needs to be further elucidated.

Regards

Editorial Office of International Journal of Nanoscience and Nanotechnology

Dear **Mr. Yaung - Kwee**

I have now received the referee's report on the revised version of your paper. The referee recommends publication in IJNN. I am happy to accept it for publication.

Please, send the source file of final version of your paper using your account in IJNN according to the following comments:

1- If you can find some good papers in our journal which are related to your article and if you are agree, please insert them in the list of your references. You can see the full text of all published papers in IJNN in the following home page:

Manuscript Title: **A Review of Combing agents to carbon Dots for Biomedical Applications**

Authors: Yaung - Kwee, Yaung - Kwee

Dear **Mr. Yaung - Kwee**

This is to confirm that after technical and in-house evaluation, the above mentioned manuscript has been finalized and accepted for publication in the *International Journal of Nanoscience and Nanotechnology(IJNN)*.

Truly yours,

Editorial Office of **International Journal of Nanoscience and Nanotechnology (IJNN)**
