Manuscript to be revised... 2
Dear Author, Our chief-in-editor has reviewed your revised manuscript...

Found in: Inbox - drnurrochmah@gmail.com Mailbox

P **Pediatrica indonesia** 5 February 2015 11.42
 Manuscript to be revised 813
 To: nur rochmah

Dear Author,
 We have reviewed your manuscript and made some changes needed (highlighted in yellow). Please do the revision in enclosed manuscript based on our editors' comments below:

p 1 Changed the title to:
 Diabetic ketoacidosis in children: an 11-year retrospective in Surabaya, Indonesia

p 4 Length of patient stay
 Is this mean? median?

p 5 Similarly, another study stated that DKA often presented with vomiting, abdominal pain, dyspnea, weakness, anorexia, and changes in mental status.REF? Two studies also showed that children with diabetic ketoacidosis had significantly greater weight loss than those without.14-16
 Please clarify which reference goes with which sentence.

p 5 Mortality in ARF complicating DKA was 40%.17
 Please explain 'complicating DKA'?

and kindly send back to us the revised manuscript before February 12, 2015 in order to avoid any delay in our journal publication.

Your cooperation is very much appreciated.

Thank you.

Regards,

Paediatrica Indonesia x813-PI- ----

Dear Authors,
Congratulations for your manuscript publication on our journal Paediatrica Indonesiana Vol. 55 (1), January 2015.

Below is the list of manuscript on November edition:

Correlation between lipid profile and C-reactive protein in children with nephrotic syndrome
Kurnia Dwi Astuti, Mohammad Heru Muryawan, Omega Mellyana

Mantoux test results and BCG vaccination status in TB-exposed children
Fadilah Harahap, Ridwan M. Daulay, Muhammad Ali, Wisman Dalimunthe, Rini Savitri Daulay

Effect of phototherapy with aluminium foil reflectors on neonatal hyperbilirubinemia
Tony Ijong Dachlan, Tetty Yuniati, Abdurachman Sukadi

Early allergy symptoms in infants aged 0-6 months on breast milk substitutes
Mulya Safri, Aulia Rahman Putra

Linear growth patterns in small for gestational age and preterm infants after zinc supplementation
Caecilia Nancy Setiawan , Gatot Irawan Sarosa, Mexitalia Setiawati

adequate for the number of items in the scales. The symptom impact scale had a Cronbach's alpha value of 0.51; and the impact of treatment scale had a Cronbach's alpha of 0.47, which were satisfactory for subscales containing????18 This paragraph uses terms that are somewhat different from the terms used in Table 2. Please choose term for each sub scale and be consistent with usage. Inconsistent use of terms is confusing for readers. Also, please complete the last sentence of the paragraph.

p 2 < 5 years (group 1) or > 5 years
Please underline either < or >, accordingly.

p 3 Table 2. Mean DqoLY scores for < 5 year and > 5 year duration of illness
Please underline either < or >, accordingly.

p 3 Table 2:
-Please underline < or >, accordingly.
-Please include P values in the table.

p 3 Table 3:
-Should we see the n= ? for each group?
-Would you like to include the P values?

p 4 In our 22 subjects, we found no significant difference in total DQoLY scores between groups (P=0.72). In groups 1 and 2, the mean feeling sick scores were 0.6 (SD 1.20) and 1.8 (SD 0.98), respectively, while the mean school activities limitation scores were 0.5 (SD 1.21) and 1 (SD 1.1), respectively. Group 2 with a duration of illness > 5 years had significantly better feeling sick score (P=0.007) and school activities limitation score (P=0.02) than those of group 1, who had < 5 year duration of illness.
-Where is this data?
-Please give the P values.
-Do we need another table for this data?

p 4 Our study showed that more than 5 year duration of illness was associated with better DQoLY, compared to less than 5 year duration of illness.
Please add 'or equal to' as appropriate.

p 4 We found that the categories of impact of treatment, the parent issue, and health perception in DQoLY, were better in the group with more than 5 year duration of illness.
What were the P values? Significant?
