Manuscript to be revised 795
To: nur rochmah

Dear Author,
We have reviewed your manuscript and made some changes needed (highlighted in yellow). Please do the revision in enclosed manuscript based on our editors' comments below:

p 1 Changed the title to:
Duration of illness and quality of life in children with type-1 diabetes mellitus

P1 author's name Netty EP , please define EP

p 1 those with > 5 year duration of illness (group 1) and those with < 5 year duration of illness (group 2).
Either the > or the < symbol needs an underline in order to include kids who were 5 years old. This change should be incorporated throughout the paper.

p 1 Mean feeling sick scores were 0.6 (SD 1.20) and 1.8 (SD 0.98) while mean of school activities limitation scores were 0.5 (SD:1.21) and 1 (SD:1.1) in group 1 and 2, respectively.
-Changed average to mean
-Sickness feeling has an odd sound, so I changed it to feeling sick. Should the authors like to clarify?
-Where is the data for all this? Also, no P values are given.

p 1 feeling sick (P=0.007) and limitation in school activities (P=0.02).
Where is this data?

p 1 Conclusion Duration of illness > 5 years is associated with better QoL compared to < 5 year duration of illness.
Authors, would you like to clarify that the total scores were not significantly different, but the sub scales were?

p 2 400–600 children and adolescents. The Centers for Disease Control reported the overall incidence of T1DM to be 24.3 per 100,000 per year
