Subject: Your article has been accepted for Publication. (**Bagus SetyoBoedi, Anang Endaryanto, Sjamsul Arief, "CORTICOSTEROID EFFECTS AND ADMINISTRATION TIME DIFFERENCE ON MICE MODEL OF BILIARY ATRESIA"**)

Dear **Prof. Dr. Bagus SetyoBoedi**,

It's a great pleasure for me to inform you that your manuscript which titled "**CORTICOSTEROID EFFECTS AND ADMINISTRATION TIME DIFFERENCE ON MICE MODEL OF BILIARY ATRESIA**" has been accepted and in case of you complete publication proces within a week it will be finalized for **issue 2020; volume 13 number 2** which will be released either late June 2020 or early July 2020 other way your article will be sckeduled publish **issue 2020; volume 13 number 3** which will be released either late September 2020 or early October 2020 .

Before sending manuscript to press, I will send to you the press ready copy for your final checking.

Sincerely yours.

Publication processing charges for your article is **1000 US\$**.

Please complete to the publication process for your accepted article.

Sincerely yours.

1- By bank transfer to the my account (as 1000 US\$).

Please carefully fill in transaction form and indicate to the; **Full Account Beneficiary Name, Account IBAN number and article ID number** at the "Remittance Information" section over the transaction or swift bill (pay slip).

Please inform me money order date when you did.

Dear Bagus Setyoboedi

Your submission was received by the editorial office of the journal and will soon be processed .

Summary of submission

EXPRESSION OF CYTOKERATIN – 7 AND CYTOKERATIN – 19 ON NEWBORN MICE INDUCED RHESUS ROTAVIRUS AS BILIARY ATRESIA MODEL**Manuscript ID** : 27119 - 45942020241153**Date submission started** : 24 Nov 2020**Date submission ended** : 24 Nov 2020**Authors** : Bagus Setyoboedi, Anang Endaryanto, Sjamsul Arief, Ahmad Rofii**Submitted as** : Research**Keywords** : Biliary Atresia; Cytokeratin – 7; Cytokeratin – 19; Mice Model (Histopathology, Pediatrics (general))**Journal** : Pan African Medical Journal**Abstract**

Background: Biliary atresia (BA) is a progressive inflammatory obstruction and fibro-obliteration of the partial or total extrahepatic and intrahepatic bile ducts during the perinatal period. Biliary atresia occurs in about 1 in 5000 to 8000 live births and 50% require liver transplantation. This study aims to investigate the influence of induction and duration of illness after rhesus rotavirus (RRV) exposure to changes in the expression of CK – 7 and CK – 19 in mice models of AB.

Methods : A total of 48 Balb/c less than a day after birth as model of BA. The overall sample was split randomly by using the randomization table into 4 control groups and 4 treatment groups. Groups 1, 2, 3, and 4 composed of 24 infant mice Balb/c (each group of 6 tails) with blue color code get a placebo (buffered saline) intraperitoneally less than a day after birth. Groups 5, 6, 7, and 8 were composed of 24 mice Balb/c (each group of 6 tails) with red color code get induction RRV 1.5 x 10⁶ PFU as treatment groups.

Results: There are influence of the RRV induced changes in the expression of CK – 7 murine model of BA day 3, 7, 14 and 21 after induction compared to the control (p<0.05). There was interaction between induction effects and duration of illness after RRV exposure to CK – 7 expression in murine models of BA on days 3, 7, 14 and 21 (p<0.001). The difference in the value of CK – 19 expressions progressively between trial group and control group seen from day-3 and the large difference in expression values obtained on day 21.

Conclusion : Induction and duration of illness after rhesus rotavirus exposure effect on the expression of cytokeratin – 7 and cytokeratin – 19 mice models of biliary atresia.

Cover letter

Please find enclosed our manuscript entitled "EXPRESSION OF CYTOKERATIN – 7 AND CYTOKERATIN – 19 ON NEWBORN MICE INDUCED RHESUS ROTAVIRUS AS BILIARY ATRESIA MODEL". It is our hope for this work which has never been published before or submitted to other journals to be considered for publication in this journal. This manuscript is our own original work and all of the authors approved and agreed to submit this manuscript to PAMJ. Best regards Bagus Setyoboedi

Article Processing Charges : I will pay the Article Processing Charges of 180 USD

Justification :

We will get back to you as soon as possible by email to inform you on the status of your submission. Thank you for considering the Pan African Medical Journal with your submission.

Dear Bagus Setyoboedi,

Manuscript: EXPRESSION OF CYTOKERATIN – 7 AND CYTOKERATIN – 19 ON NEWBORN MICE AS BILIARY ATRESIA MODEL

We are pleased to inform you that your manuscript is now formally accepted for publication in Pan African Medical Journal and will soon be published, pending payment the of Manuscript Processing Charges (if applicable; see the Manuscript Processing Charges Summary below).

Article Processing Charges (APC): If article processing charges apply to this journal and you opted to pay, APC should be paid in full within 10 days of acceptance of the manuscript. Failure to pay the Article Processing Charges within 10 days of acceptance may result in the automatic rejection of your submission.

BEWARE OF SCAMMERS: The Pan African Medical Journal only accepts payments through PayPal (to the address sales-service@panafrican-med-journal.com) and Bank transfer (to our Standard Chartered Bank Account in Kenya). Before making any payment, contact sales-service@panafrican-med-journal.com or the editor in charge of your submission.

Your manuscript is currently undergoing a quality control audit and the editorial team will eventually get back to you if need be.

Thank you for trusting the Pan African Medical Journal with your submission.

Manuscript Processing Charges Summary

- **Your decision on Article Processing Charges:** *Will pay full*
- **Your comments on Article Processing Charges:** *Non applicable*
- **Journal decision on your waiver request:** Non applicable
- **Amount to be paid by the authors:** 180 USD

Thank you for accepting to pay the Article Processing Charges (APC) of **180 USD**. You are contributing to the development of medical publishing and Open Access in Africa.

We expect authors to complete payment of APC within 10 days of acceptance of the manuscript to avoid delays in its publication. Failure to pay Article Processing Charges within 10 dys will result in the rejection of the manuscript.

The journal currently accepts 3 forms of payment; please chose below which one is suitable for you. Transfer fees must be covered by the person making the payment:

BEWARE OF SCAMMERS..! The PAMJ will never ask you to send payment by means other than

bank transfer, PayPal (to the email address sales-service@panafrican-med-journal.com, or Mobile

Money (for Cameroon only). We do not request payments by bitcoins or other crypto currencies/wallets. Contact the PAMJ if you have questions.

EXPRESSION OF CYTOKERATIN – 7 AND CYTOKERATIN – 19 ON NEWBORN MICE AS BILIARY ATRESIA MODEL (28408)

Dear Bagus

Your manuscript is in quality control. We have identified few issues that should be corrected before we proceed with the processing of your manuscript:

1. All PAMJ Journals adopted the [STROBE guidance](https://www.equator-network.org/reporting-guidelines/strobe/) (<https://www.equator-network.org/reporting-guidelines/strobe/>) to help improve the structure and presentation of your paper. We suggest you use the relevant [STROBE Checklist](https://www.equator-network.org/reporting-guidelines/strobe/) (<https://www.equator-network.org/reporting-guidelines/strobe/>) to help format your manuscript. Here is an example of a publication adhering to the STROBE checklist: <https://www.panafrican-med-journal.com/content/article/41/3/full/>
2. Kindly add all the necessary subsections under the method sections as per the strobe guidelines.
3. Your revised manuscript should include, as an annex, the completed relevant STROBE checklist, indicating the pages in which the checklist items are included.

Submit the revised version of your manuscript through the online system. Do not submit the revised version of your manuscript as a new manuscript, it will delay the processing. To submit the revised version of your manuscript, follow the steps below:

- Log into the Manuscript Hut using the email and password you used to submit this manuscript
- Locate the manuscript tagged for resubmission and follow the link to upload the revised version

Thank you for trusting us with your submission

EXPRESSION OF CYTOKERATIN - 7 AND CYTOKERATIN - 19 ON NEWBORN MICE AS BILIARY ATRESIA MODEL (28408)

Dear Bagus,

Your manuscript is in quality control. We have identified few issues that should be corrected before we proceed with the processing of your manuscript:

1. The journal insists that, every element from the methods and results section be explained under subheadings as provided in the STROBE checklist and below: Methods: Study design, setting, participants, variables, data sources/measurement, bias, study size, quantitative variables, statistical methods. Results: participants, descriptive data, outcome data, main results, other analyses.
2. Label the X axis in the graphs in your figures 5 and 6.
3. All the required sections should be included in the manuscript including: Conclusion section.
4. Please carefully review the journal instructions for authors (<https://www.panafrican-med-journal.com/view/content.php?item=ifa>). Failure to comply with the journal instructions for authors may result in the rejection of your manuscript.

Submit the revised version of your manuscript through the online system. Do not submit the revised version of your manuscript as a new manuscript, it will delay the processing. To submit the revised version of your manuscript, follow the steps below:

- Log into the Manuscript Hut using the email and password you used to submit this manuscript
- Locate the manuscript tagged for resubmission and follow the link to upload the revised version

Thank you for trusting us with your submission

PAMJ Clinical Medicine - Manuscript in quality control [Manuscript ID 22011]

Dari: Editor - Manuscript Hut Pan African Medical Journal (editor@panafrican-med-journal.com)

Kepada: bagus.setyo boedi@fk.unair.ac.id, winnie.mwema@panafrican-med-journal.com

Tanggal: Senin, 16 Maret 2020 pukul 15.52 WIB

Comparison Of CD4+/Foxp3+ And CD4+/IL-17+ Cells Counts On Cholestatic Infants with and without Biliary Atresia (22011)

Dear Bagus,

Your manuscript is in quality control. We have identified few issues that should be corrected before we proceed with the processing of your manuscript:

1. Please note that all figures should be of high definition and at least 400x400 pixels.
2. Strictly follow the reference style of the journal and ensure that your references are formatted accordingly.
3. Please carefully review the journal instructions for authors (<https://www.clinical-medicine.panafrican-med-journal.com/view/content.php?item=ifa>). Failure to comply with the journal instructions for authors may result in the rejection of your manuscript.

Submit the revised version of your manuscript through the online system. Do not submit the revised version of your manuscript as a new manuscript, it will delay the processing. To submit the revised version of your manuscript, follow the steps below:

- Log into the Manuscript Hut using the email and password you used to submit this manuscript
- Locate the manuscript tagged for resubmission, locate your manuscript and follow the link to upload the revised version

Thank you for trusting us with your submission

Winnie Mwema, Assistant editor

winnie.mwema@panafrican-med-journal.com

Balas Ke: bjcp@ymail.com

Kepada: bagus.setyoboedi@fk.unair.ac.id

Dear Dr Bagus Setyoboedi,

Thank you for submitting the manuscript, "The Agreement of CMV Serology Examination And CMV PCR of Liver Tissue in Infant With Cholestasis" to Sri Lanka Journal of Child Health. With our online journal management system, you will be able to track its progress through the editorial process by logging in to the journal [web site](#).

Your submission will now be considered by our Editors. Research papers deemed appropriate for the journal will proceed directly to peer review, which generally take around 8 weeks to be completed. Non-research papers will undergo a full Editorial review process, which will take 2-3 weeks. Following the completion of the review, you will be contacted by journal staff with review feedback.

Thank you for considering this journal as a venue for your work. Please get in touch should you have any questions regarding your paper.

Kind regards,

-- Sri Lanka Journal of Child Health editorial team.

Dear Bagus Setyoboedi (Corresponding author)

As indicated in the web site of the Sri Lanka Journal of Child Health, it is now necessary for us to have your internationally recognised ORCID ID (ORCID Identification Number) to be included in the manuscript. This number has a format such as **0000-0001-7789-8793**, which is the ORCID ID of Dr. B.J.C. Perera, the other Joint Editor.

Please be kind enough to send us the ORCID IDs of each of the [authors.to](#) be inserted into the metadata of the article in the journal web site. In case you do not have this number yet, please go to the website of ORCID (<https://orcid.org/register>) and register. This registration is free and would take only a couple of minutes.

The article will not be accepted for publication unless the ORCID IDs of all the authors are received.

Regards

Dr G N Lucas

Joint Editor SLJCH

P.S. Please also confirm that you are the corresponding author

CORRELATION BETWEEN INTERFERON- α EXPRESSION, CHOLESTASIS GRADING, AND BILIARY ATRESIA INCIDENCE IN NEONATAL CHOLESTASIS

Setyo boedi B, Mahfur A, Rahniayu A, Endaryanto A and Arief S

Thank you for your submission to F1000Research. We have noted a few issues with your manuscript (below) – once these are addressed we will be pleased to accept your article for publication.

Content: Heavy copyediting has been performed in order to improve the flow and readability of your article; please make sure the meaning has been maintained.

Content: As part of our pre-publication checks, we use iThenticate software to check that manuscripts have not been published elsewhere and that they are original. We have found that your manuscript is similar to other sources in certain sections (highlighted yellow). We would ask you to re-word these sections.

Content: We endorse the STROBE reporting guidelines for reporting observational studies; we suggest that you ensure the article adheres to the checklist and add any details that are missing. The comments in the manuscript provide some queries relating to the checklist, but these are not exhaustive.

Methods: There seems to be some missing information in your Methods. Please bear in mind that reviewers and readers must be exactly able to recreate your study from the level of detail that you give. Track Changes provide comments in the manuscript, but these are not exhaustive.

Data analysis: Please provide the details of the software you used to conduct your data analysis including the version number of the software and a weblink.

Research Resource Identifiers (RRIDs): We encourage you to add [RRIDs](#) in order to identify the following types of resources that are included in your article: software tools. More information on this project is available from the Resource Identification Initiative and RRIDs can be obtained from the portal.

Figures: Please provide the figure as a separate file in either TIFF or JPEG format at >300dpi. Please send this as an attachment in response to this email.

Reviewers: As you know, F1000Research operates an author-driven publication model. This means that you will be responsible for suggesting suitable reviewers, whom we invite on your behalf, giving you an opportunity to ensure that appropriate experts review your article. Our transparent peer review process means that the peer review reports, together with the reviewers' names, will be published alongside your article.

To avoid delay to the publication process, we need you to provide us with at least five potential reviewers who meet our reviewer criteria before we can publish your article - please be aware that it is likely we will need to request further reviewer suggestions after publication. Please go to your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; use this page to track the progress of the peer review process for your article. You can access this page directly via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#).

Please remember that suggested reviewers should have appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). All reviewer suggestions are checked by the editorial team and will be rejected if they do not meet our criteria.

Payment: As F1000Research is open access, we will require payment of the Article Processing Charge (APC) to be able to complete the processing of your submission. The APC is \$1350.00 (ex. VAT) after any discounts you are eligible for have been applied. **Please provide us with the details of the individual/organization taking responsibility for paying the fee as soon as possible.** Please sign in with the credentials you used to submit the article or you will not be able to access this page. Our Accounts department will be in touch regarding payment.

We have also lightly copyedited your article - please [download the document](#) and check you are happy with the amendments and **then address the queries detailed above using track changes in Word. Please return your revised manuscript to the e-mail address above.** Please note that this is your final opportunity to make any changes to the content of your manuscript. Once the typeset PDF of your manuscript has been created, we will send you a final PDF proof

for checking prior to publication.

Please respond to this email within two weeks addressing any issues raised. After two weeks, we will send you a reminder email to complete your revisions. If we do not hear from you within seven weeks your submission will be withdrawn.

Best wishes,

Lisa
The Editorial Team, F1000Research

Dear Bagus,

Thank you for returning your revised manuscript.

I have checked the revisions and there are several issues still to address, detailed as follows:

- We have found that your manuscript is similar to other sources in certain sections (highlighted yellow). Please reword these sections.
- We endorse the STROBE reporting guidelines for reporting observational studies; please ensure the article adheres to the STROBE checklist. I have mentioned several items that are missing from the article that should be included; please see my comments in the text.
- Please can you provide further information about the immunohistology examination you carried out including details of any antibodies used; please see my comment in the manuscript.
- Please provide Figure 1 as a separate file in TIFF or jpeg format with a resolution of at least 300dpi.

I attach the current version of your manuscript and I look forward to hearing from you.

Best wishes,

Lisa

CORRELATION BETWEEN INTERFERON- γ EXPRESSION, CHOLESTASIS GRADING, AND BILIARY ATRESIA INCIDENCE IN NEONATAL CHOLESTASIS

Setyoboedi B, Mahfur A, Rahniayu A, Endaryanto A and Arief S

Thank you for your submission to F1000Research. We have noted a few issues with your manuscript (below) – once these are addressed we will be pleased to accept your article for publication.

Content: Heavy copyediting has been performed in order to improve the flow and readability of your article; please make sure the meaning has been maintained.

Content: As part of our pre-publication checks, we use iThenticate software to check that manuscripts have not been published elsewhere and that they are original. We have found that your manuscript is similar to other sources in certain sections (highlighted yellow). We would ask you to re-word these sections.

Content: We endorse the STROBE reporting guidelines for reporting observational studies; we suggest that you ensure the article adheres to the checklist and add any details that are missing. The comments in the manuscript provide some queries relating to the checklist, but these are not exhaustive.

Methods: There seems to be some missing information in your Methods. Please bear in mind that reviewers and readers must be exactly able to recreate your study from the level of detail that you give. Track Changes provide comments in the manuscript, but these are not exhaustive.

Data analysis: Please provide the details of the software you used to conduct your data analysis including the version number of the software and a weblink.

Research Resource Identifiers (RRIDs): We encourage you to add [RRIDs](#) in order to identify the following types of resources that are included in your article: software tools. More information on this project is available from the Resource Identification Initiative and RRIDs can be obtained from the portal.

Figures: Please provide the figure as a separate file in either TIFF or JPEG format at >300dpi. Please send this as an attachment in response to this email.

Reviewers: As you know, F1000Research operates an author-driven publication model. This means that you will be responsible for suggesting suitable reviewers, whom we invite on your behalf, giving you an opportunity to ensure that appropriate experts review your article. Our transparent peer review process means that the peer review reports, together with the reviewers' names, will be published alongside your article.

To avoid delay to the publication process, we need you to provide us with at least five potential reviewers who meet our reviewer criteria before we can publish your article - please be aware that it is likely we will

need to request further reviewer suggestions after publication. Please go to your [Suggest Reviewers](#) page, where you will find a useful tool to help you find reviewers; use this page to track the progress of the peer review process for your article. You can access this page directly via the article's record under My Research >> Submissions. See also our [reviewer criteria and tips for finding reviewers](#).

Please remember that suggested reviewers should have appropriate level of experience and the right expertise to judge your article; they must be able to provide an unbiased report (e.g. they must not be recent collaborators or colleagues in your institute). All reviewer suggestions are checked by the editorial team and will be rejected if they do not meet our criteria.

Payment: As F1000Research is open access, we will require payment of the Article Processing Charge (APC) to be able to complete the processing of your submission. The APC is \$1350.00 (ex. VAT) after any discounts you are eligible for have been applied. **Please provide us with the details of the individual/organization taking responsibility for paying the fee as soon as possible.** Please sign in with the credentials you used to submit the article or you will not be able to access this page. Our Accounts department will be in touch regarding payment.

We have also lightly copyedited your article - please [download the document](#) and check you are happy with the amendments and **then address the queries detailed above using track changes in Word.** **Please return your revised manuscript to the e-mail address above.** Please note that this is your final opportunity to make any changes to the content of your manuscript. Once the typeset PDF of your manuscript has been created, we will send you a final PDF proof for checking prior to publication.

Please respond to this email within two weeks addressing any issues raised. After two weeks, we will send you a reminder email to complete your revisions. If we do not hear from you within seven weeks your submission will be withdrawn.

Best wishes,

Lisa
The Editorial Team, F1000Research

Dear Bagus,

Thank you very much for your email.

It looks like you have sent a previous version of the manuscript. Please can you make any amendments to the version I sent on 16th May? I also noticed that Figure 1 is only 150dpi; please can you increase the resolution to 300dpi as this is the minimum we require for publication.

Dear Lisa

Thanks for the correction

We want to change the analysis of variables from the study that we submitted to F1000, we have other variables that we want to add, is it possible for our paper and data to be revised again?

Thank you

Best regards

Bagus Setyoboedi

Dear Bagus,

Thank you for sending your revised manuscript, which I received yesterday, and for your email today. You are very welcome to add further variables and change the analyses. Can you tell me when you expect to be able to send us the revised manuscript and I can then put your article on hold until this time?

Best wishes,

Lisa
