## Review Article

[Intracranial hemorrhage management in the multi-omics era](#)

Xianjing Feng, Xi Li, Jie Feng, Jian Xia

e14749

[Full-Text HTMLPDF](#)[Evaluation and management of acute high-grade immunotherapy-related neurotoxicity](#)

Marcelo Sandoval, Adriana H. Wechsler, Zahra Alhajji, Jayne Viets-Upchurch, Patricia Brock, Demis N. Lipe, Aisha Al-breiki, Sai-Ching J. Yeung

e13725

[Full-Text HTMLPDF](#)[Decoding the bidirectional relationship between gut microbiota and COVID-19](#)

Tanya Ralli, Zoya Saifi, Anjali Rathee, Vidhu Aeri, Kanchan Kohli

e13801

[Full-Text HTMLPDF](#)[Decrypting the multi-functional biological activators and inducers of defense responses against biotic stresses in plants](#)

Bahman Khoshru, Debasis Mitra, Kuldeep Joshi, Priyanka Adhikari, Md Shafiu Islam Rion, Ayomide Emmanuel Fadiji, Mehrdad Alizadeh, Ankita Priyadarshini, Ansuman Senapati, Mohammad Reza Sarikhani, Periyasamy Panneerselvam, Pradeep Kumar Das Mohapatra, Svetlana Sushkova, Tatiana Minkina, Chetan Keswani

e13825

[Full-Text HTMLPDF](#)[Molecular basis of skin photoaging and therapeutic interventions by plant-derived natural product ingredients: A comprehensive review](#)

Malik A. Tanveer, Haroon Rashid, Sheikh A. Tasduq

e13580

[Full-Text HTMLPDF](#)

## [Aspects of an experimental study of hydrogen use at automotive diesel engine](#)

A. Cernat, C. Pana, N. Negurescu, C. Nutu, D. Fuiorescu, G. Lazaroiu  
e13889

[Full-Text HTMLPDF](#)

## [A review of manufacturing processes, mechanical properties and precipitations for aluminum lithium alloys used in aeronautic applications](#)

El Arbi Hajjioui, Kenza Bouchaâla, Mustapha Faqir, Elhachmi Essadiqi  
e12565

[Full-Text HTMLPDF](#)

## [A review of the application of artificial intelligence to nuclear reactors: Where we are and what's next](#)

Qingyu Huang, Shinian Peng, Jian Deng, Hui Zeng, Zhuo Zhang, Yu Liu, Peng Yuan  
e13883

[Full-Text HTMLPDF](#)

## [Morpho-physiological and biochemical response of rice \(\*Oryza sativa\* L.\) to drought stress: A review](#)

Utsav Bhandari, Aakriti Gajurel, Bharat Khadka, Ishwor Thapa, Isha Chand, Dibya Bhatta, Anju Poudel, Meena Pandey, Suraj Shrestha, Jiban Shrestha  
e13744

[Full-Text HTMLPDF](#)

## [Structural insights and shedding light on preferential interactions of dietary flavonoids with G-quadruplex DNA structures: A new horizon](#)

Sagar Bag, Mangal Deep Burman, Sudipta Bhowmik  
e13959

[Full-Text HTMLPDF](#)

## [Reappraisal of evolving methods in non-invasive prenatal screening: Discovery, biology and clinical utility](#)

Riyaz Ahmad Rather, Subhas Chandra Saha  
e13923

[Full-Text HTMLPDF](#)

## [Phytochemicals as alternative fungicides for controlling plant diseases: A comprehensive review of their efficacy, commercial representatives, advantages, challenges for adoption, and possible solutions](#)

Ebisa Mirete Deresa, Tamiru Fayisa Diriba  
e13810

[Full-Text HTMLPDF](#)

## [Commercial device-based hand rehabilitation systems for stroke patients: State of the art and future prospects](#)

Bo Sheng, Jianyu Zhao, Yanxin Zhang, Shengquan Xie, Jing Tao  
e13588

[Full-Text HTMLPDF](#)

## [On the relationship between second language learners' grit, hope, and foreign language enjoyment](#)

Yanli Zhao  
e13887

[Full-Text HTMLPDF](#)

## [An update on COVID-19: SARS-CoV-2 variants, antiviral drugs, and vaccines](#)

Varghese Edwin Hillary, Stanislaus Antony Ceasar  
e13952

[Full-Text HTMLPDF](#)

### **Intensive insulin therapy in sepsis patients: Better data enables better intervention**

Ling Wang, Min Wang, Jie Du, Zhi-cheng Gong  
e14063

[Full-Text HTMLPDF](#)

### **Lifestyle, clinical, and occupational risk factors of recurrent stroke among the working-age group: A systematic review and meta-analysis**

Araya Chiangkhong, Charin Suwanwong, Yupha Wongrostrai  
e13949

[Full-Text HTMLPDF](#)

### **Advanced visual sensing techniques for on-site detection of pesticide residue in water environments**

Eliasu Issaka, Mary Adumo Wariboko, Nana Adwoa Nkuma Johnson, Ofosuhemaa Nyame-do Aniagyei  
e13986

[Full-Text HTMLPDF](#)

### **A bibliometric review of global visibility, impact and adoption of electronic invoicing: The past and the future**

Sunday Adewale Olaleye, Ismaila Temitayo Sanusi, Oluwaseun Alexander Dada, Friday Joseph Agbo  
e13726

[Full-Text HTMLPDF](#)

### **Main theoretical consumer behavioural models. A review from 1935 to 2021**

María Dolores Reina Paz, Juan Carlos Rodríguez Vargas  
e13895

[Full-Text HTMLPDF](#)

### **Identifying research progress, focuses, and prospects of local climate zone (LCZ) using bibliometrics and critical reviews**

Ping Yu Fan, Qing He, Yi Zhou Tao  
e14067

[Full-Text HTMLPDF](#)

### **The role of hand fingerprints on predisposition of cancer development**

Sakineh Abbasi, Seyed Mohammad Ayyoubzadeh  
e14074

[Full-Text HTMLPDF](#)

### **Interrogating higher education's responses to international student mobility in the context of the COVID-19 pandemic**

Mohammad Moninoor Roshid, Prodhah Mahbub Ibna Seraj  
e13921

[Full-Text HTMLPDF](#)

### **N6-methyladenosine (m6A) as a regulator of carcinogenesis and drug resistance by targeting epithelial-mesenchymal transition and cancer stem cells**

Chuhan Wang, Danli ma, Huimin Yu, Zhihong Zhuo, Zhiying Ye  
e14001

[Full-Text HTMLPDF](#)

### **A conceptual framework of supply chain resilience towards sustainability through a service-dominant logic perspective**

Hakim Manurung, Gatot Yudoko, Liane Okdinawati  
e13901

[Full-Text HTMLPDF](#)

### Sustainable digital transformation in small and medium enterprises (SMEs): A review on performance

Dr. Isotilia Costa Melo, Geandra Alves Queiroz, Paulo Nocera Alves Junior, Thales Botelho de Sousa, Wilfredo F Yushimito, Jorge Pereira

e13908

[Full-Text HTMLPDF](#)

### Human virome: Implications in cancer

Rafael Tamayo-Trujillo, Patricia Guevara-Ramírez, Santiago Cadena-Ullauri, Elius Paz-Cruz, Viviana A. Ruiz-Pozo, Ana Karina Zambrano

e14086

[Full-Text HTMLPDF](#)

### Revolution in orthopedic immobilization materials: A comprehensive review

Chathushika Ekanayake, J.C.P.H. Gamage, P. Mendis, P. Weerasinghe

e13640

[Full-Text HTMLPDF](#)

### Data mining techniques for predicting teacher evaluation in higher education: A systematic literature review

Ricardo Ordoñez-Avila, Nelson Salgado Reyes, Jaime Meza, Sebastián Ventura

e13939

[Full-Text HTMLPDF](#)

### A xanthine oxidase inhibit activity component from biotransformation of cholesterol by *Streptomyces cellulosa* WHX1301

Haixin Wei, Chiguang Yang, Chenhong Weng, Xiangdong Zhu

e14160

[Full-Text HTMLPDF](#)

### Myocarditis in patients on long-term antipsychotics –mechanism, management and recent updates

Patterson Daniel, Katta Maanya Rajaree, Luna Rudy, Sadeque Jafor, Sakshi Prasad, Chaithanya Avanthika, Sharan Jhaveri

e13930

[Full-Text HTMLPDF](#)

### *Senna singueana* (Delile) lock: Ethnomedicinal uses and medicinal properties

Asha Ripanda, Amos Luanda, Geoffrey S. Mtabazi, John J. Makangara

e14098

[Full-Text HTMLPDF](#)

### Chicken embryo as a model in second heart field development

Imadeldin Yahya, Beate Brand-Saberi, Gabriela Morosan-Puopolo

e14230

[Full-Text HTMLPDF](#)

### Removal of arsenic as a potentially toxic element from drinking water by filtration: A mini review of nanofiltration and reverse osmosis techniques

Hoda Pezeshki, Majid Hashemi, Saeed Rajabi

e14246

[Full-Text HTMLPDF](#)

### Effects of acceptance and commitment therapy on cognitive function: A systematic review

Haihong Liu, Nan Liu, Sheau Tsuey Chong, Eugene Koh Boon Yau, Abdul Rahman Ahmad Badayai

e14057

[Full-Text HTMLPDF](#)

## [Evaluating the effectiveness of probiotics in relieving constipation in Parkinson's disease: A systematic review and meta-analysis](#)

Nasibeh Ghalandari, Farhad Assarzagdegan, Hossein Mahdavi, Elham Jamshidi, Hadi Esmaily  
e14312

[Full-Text HTMLPDF](#)

## [Drinking water quality monitoring, assessment and management in Pakistan: A review](#)

Shazia Perveen, Amar-UI-Haque  
e13872

[Full-Text HTMLPDF](#)

## [The experience of stigma in family caregivers of people with schizophrenia spectrum disorders: A meta-synthesis study](#)

Azadeh EghbalManesh, Asghar Dalvandi, Mohammad Zoladl  
e14333

[Full-Text HTMLPDF](#)

## [Reviews of taxonomy, epidemiology, and management practices of the barley scald \(\*Rhynchosporium graminicola\*\) disease](#)

Girma Ababa, Asela Kesho, Yitagesu Tadesse, Dereje Amare  
e14315

[Full-Text HTMLPDF](#)

## [A review on pathogenicity of \*Aeromonas hydrophila\* and their mitigation through medicinal herbs in aquaculture](#)

Anurag Semwal, Avdhesh Kumar, Neelesh Kumar  
e14088

[Full-Text HTMLPDF](#)

## [An emerging era in manufacturing of drug delivery systems: Nanofabrication techniques](#)

Prashant Pingale, Prakash Kendre, Krutika Pardeshi, Amarjitsing Rajput  
e14247

[Full-Text HTMLPDF](#)

## [Sulfated polysaccharides as multi target molecules to fight COVID 19 and comorbidities](#)

Enrique Javier Carvajal-Barriga, R. Douglas Fields  
e13797

[Full-Text HTMLPDF](#)

## [Interactions between silica and titanium nanoparticles and oral and gastrointestinal epithelia: Consequences for inflammatory diseases and cancer](#)

Cássio Luiz Coutinho Almeida-da-Silva, Leticia Ferreira Cabido, Wei-Chun Chin, Ge Wang, David M. Ojcius, Changqing Li  
e14022

[Full-Text HTMLPDF](#)

## [DNA-based detection of pork content in food](#)

Muflihah, Ari Hardianto, Pintaka Kusumaningtyas, Sulisty Prabowo, Yeni Wahyuni Hartati  
e14418

[Full-Text HTMLPDF](#)

## [Novelty-induced memory boosts in humans: The when and how](#)

A. Lorents, M.F.L. Ruitenber, J. Schomaker  
e14410

[Full-Text HTMLPDF](#)

## **Research Article**

## [A review on sliding wear properties of sustainable biocomposites: Classifications, fabrication and discussions](#)

Harikrishnan Pulikkalparambil, Ajish Babu, Anusree Thilak, N.P. Vighnesh, Sanjay Mavinkere Rangappa, Suchart Siengchin

e14381

[Full-Text HTMLPDF](#)

## [The use of animal by-products in a circular bioeconomy: Time for a TSE road map 3?](#)

Nathan Meijer, Leo W.D. Van Raamsdonk, Elise W.J. Gerrits, Marko J. Appel

e14021

[Full-Text HTMLPDF](#)

## [Recent advances in density functional theory approach for optoelectronics properties of graphene](#)

A.L. Olatomiwa, Tijjani Adam, C.O. Edet, A.A. Adewale, Abdullah Chik, Mohammed Mohammed, Subash C.B. Gopinath, U. Hashim

e14279

[Full-Text HTMLPDF](#)

## [Microplastics in water systems: A review of their impacts on the environment and their potential hazards](#)

Homin Kye, Jiyeon Kim, Seonghyeon Ju, Junho Lee, Chaehwi Lim, Yeejoon Yoon

e14359

[Full-Text HTMLPDF](#)

## [Sintering of nanocrystalline materials: Sintering parameters](#)

Bukola Joseph Babalola, Olusoji Oluremi Ayodele, Peter Apata Olubambi

e14070

[Full-Text HTMLPDF](#)

## [Phlebotomine sandflies \(Diptera: Psychodidae\) of Ethiopia](#)

Esayas Aklilu, Solomon Yared, Araya Gebresilassie, Behailu Legesse, Asrat Hailu

e14344

[Full-Text HTMLPDF](#)

## [Performance evaluation of the prospects and challenges of effective power generation and distribution in Nigeria](#)

Anthony U. Adoghe, Temitope M. Adeyemi-Kayode, Victoria Oguntosin, Irene I. Amahia

e14416

[Full-Text HTMLPDF](#)

## [A systemic review on medicinal plants and their bioactive constituents against avian influenza and further confirmation through \*in-silico\* analysis](#)

Ashit Kumar Dutta, Md Shamim Gazi, Shaikh Jamal Uddin

e14386

[Full-Text HTMLPDF](#)

## [Evaluation of efficacy of non-resorbable membranes compared to resorbable membranes in patients undergoing guided bone regeneration](#)

Shankargouda Patil, Shilpa Bhandi, Mohammed Mousa H. Bakri, Dhalia H. Albar, Khalid J. Alzahrani, Mohammad S. Al-Ghamdi, Mريم M. Alnfai, Marcos Roberto Tovani-Palone

e13488

[Full-Text HTMLPDF](#)

## [Mitochondrial dysfunction: A notable contributor to the progression of Alzheimer's and Parkinson's disease](#)

Abolaji Samson Olagunju, Foysal Ahammad, Abiola Adeyanju Alagbe, Titilayomi Ayomide Otenaike, John Oluwafemi Teibo, Farhan Mohammad, Ahad Amer Alsaiani, Olabode Omotoso, Md Enamul Kabir Talukder

e14387

[Full-Text HTMLPDF](#)

## Scientometric and multidimensional contents analysis of PM<sub>2.5</sub> concentration prediction

Jintao Gong, Lei Ding, Yingyu Lu, Qiong Zhang, Yun Li, Beidi Diao  
e14526

[Full-Text HTMLPDF](#)

## A scientometric analysis approach on the plastic sand

Bawar Iftikhar, Sophia C. Alih, Mohammadreza Vafaei, Raid Alrowais, Muhammad Tariq Bashir, Alamgir Khalil, Muhammad Rizwan, Muhammad Faisal Javed, Muhammad Faisal Rehman, Abdullah Mohamed  
e14457

[Full-Text HTMLPDF](#)

## The ceRNA network regulates epithelial-mesenchymal transition in colorectal cancer

Ruina Li, Hui Xu, Xiaoling Gao  
e14143

[Full-Text HTMLPDF](#)

## Smartphone-based corona virus detection using saliva: A mini-review

Hamide Ehtesabi, Elham Afzalpour  
e14380

[Full-Text HTMLPDF](#)

## Past and current components-based detailing of particle image velocimetry: A comprehensive review

Daniel Rohacs, Onur Yasar, Utku Kale, Selcuk Ekici, Enver Yalcin, Adnan Midilli, T. Hikmet Karakoc  
e14404

[Full-Text HTMLPDF](#)

## Solar energy policies in southeast Asia towards low carbon emission: A review

Logeswaran Govindarajan, Mohd Faizal Bin Mohideen Batcha, Mohammad Kamil Bin Abdullah  
e14294

[Full-Text HTMLPDF](#)

## Effectiveness of zebrafish models in understanding human diseases—A review of models

Mazumder Adhish, I. Manjubala  
e14557

[Full-Text HTMLPDF](#)

## Techniques of power system static security assessment and improvement: A literature survey

Engidaw Abel Hailu, George Nyauma Nyakoe, Christopher Maina Muriithi  
e14524

[Full-Text HTMLPDF](#)

## Anti-PD-(L)1 therapy of non-small cell lung cancer—A summary of clinical trials and current progresses

Keywan Mortezaee, Jamal Majidpoor  
e14566

[Full-Text HTMLPDF](#)

## Thermoprotective molecules: Effect of insulin-like growth factor type I (IGF-1) in cattle oocytes exposed to high temperatures

Samia S. Barrera, Juan S. Naranjo-Gomez, Iang S. Rondón-Barragán  
e14375

[Full-Text HTMLPDF](#)

## [Drilling characteristics and properties analysis of fiber reinforced polymer composites: A comprehensive review](#)

Praveenkumara Jagadeesh, Sanjay Mavinkere Rangappa, Indran Suyambulingam, Suchart Siengchin, Madhu Puttegowda, Joseph Selvi Binoj, Sergey Gorbatyuk, Anish Khan, Mrityunjay Doddamani, Vincenzo Fiore, Marta María Moure Cuadrado

e14428

[Full-Text HTMLPDF](#)

## [Potentiality of homestead agroforestry for achieving sustainable development goals: Bangladesh perspectives](#)

Umama Begum Ruba, Mohammad Samiul Ahsan Talucder

e14541

[Full-Text HTMLPDF](#)

## [Could deep brain stimulation be a possible solution for acquired hypothalamic obesity?](#)

Amber R. Dassen, Jiska van Schaik, Pepijn van den Munckhof, P.R. Schuurman, Eelco W. Hoving, Hanneke M. van Santen

e14411

[Full-Text HTMLPDF](#)

## [Extensive overview of soil constitutive relations and applications for geotechnical engineering problems](#)

Kennedy C. Onyelowe, Ahmed M. Ebid, Evangelin Ramani Sujatha, Farid Fazel-Mojtahedi, Ali Golaghaei-Darzi, Denise-Penelope N. Kontoni, Nabaz Nooralddin-Othman

e14465

[Full-Text HTMLPDF](#)

## [CFTR High Expresser Cells in cystic fibrosis and intestinal diseases](#)

Diego Carlos dos Reis, Parinaz Dastoor, Anderson Kenedy Santos, Kaelyn Sumigray, Nadia A. Ameen

e14568

[Full-Text HTMLPDF](#)

## [Clarifying the muddy concept of home healthcare coordination: A comprehensive theoretical framework](#)

Nathalie Möckli, J. Alberto Espinosa, Michael Simon, Carla Meyer-Masseti, Franziska Zúñiga

e14243

[Full-Text HTMLPDF](#)

## [Microbiota metabolites in the female reproductive system: Focused on the short-chain fatty acids](#)

Rasoul Mirzaei, Batoul Kavyani, Edris Nabizadeh, Hiva Kadkhoda, Mahdi Asghari Ozma, Milad Abdi

e14562

[Full-Text HTMLPDF](#)

## [A systematic review of improved positions and supporting devices for premature infants in the NICU](#)

Liu Yang, Hua Fu, Lingping Zhang

e14388

[Full-Text HTMLPDF](#)

## [Spatial pattern evolution and prediction scenario of habitat quality in typical fragile ecological region, China: A case study of the Yellow River floodplain area](#)

Hongbo Zhao, Xiaoman Xu, Junqing Tang, Zheyue Wang, Changhong Miao

e14430

[Full-Text HTMLPDF](#)

## [Current status of running renewable energy in Bangladesh and future prospect: A global comparison](#)

Md. Abdullah-Al-Mahbub, Abu Reza Md Towfiqul Islam  
e14308

[Full-Text HTMLPDF](#)

## [Health functions and related molecular mechanisms of \*Miconia\* genus: A systematic review](#)

Sathiyabama Rajiv Gandhi, Gopalsamy Rajiv Gandhi, Poovathumkal James Antony, Varghese Edwin Hillary, Stanislaus Antony Ceasar, Govindasamy Hariharan, Yi Liu, Ricardo Queiroz Gurgel, Jullyana de Souza Siqueira Quintans, Lucindo José Quintans-Júnior  
e14609

[Full-Text HTMLPDF](#)

## [How do government subsidies and consumers' low-carbon preference promote new energy vehicle diffusion? A tripartite evolutionary game based on energy vehicle manufacturers, the government and consumers](#)

Zhiying Shi, Jingwei Cheng  
e14327

[Full-Text HTMLPDF](#)

## [A state-of-the-art review on experimental investigation and finite element analysis on structural behaviour of fibre reinforced polymer reinforced concrete beams](#)

B.A. Solahuddin, F.M. Yahaya  
e14225

[Full-Text HTMLPDF](#)

## [A review on the gendered impact of COVID-19 pandemic towards achieving sustainable development goals in Bangladesh: Ecofeminist perspectives on the response to COVID-19 pandemic](#)

Sadia Afrin, Mashura Shammi

Confidence improvement

## ABSTRACT

**Background:** Cesarean section rates are increasing worldwide. Obstetrics and gynecology residents are required to be experts in this surgery to provide safe procedures. Because of the COVID-19 pandemic situation, an alternative teaching strategy is needed to achieve adequate cesarean section skills. The purpose of this study was to identify the effect of video, mannequins, and the combination of video mannequins on residents' knowledge and confidence regarding cesarean section.

**Method:** A quasi-experimental study with pre-test and post-test designs was done. Based on stratified random sampling, 33 obstetrics and gynecology residents involved as study participant. Three groups were formed and received different interventions, learning using videos, mannequins, and a combination of video-mannequins. Two kinds of questionnaires were used to examine residents' knowledge and their confidence levels. The collected data were analyzed statistically.

**Results:** Video (0.42(CI95%-0.11–0.9)), mannequin simulation (0.60(CI95%-0.04–1.25)), and the combination of video-mannequin (1.3(CI95%0.73–1.93)) significantly increased resident's knowledge regarding caesarean section skill. Study participant showed increased scores regarding confidence in their caesarean section skills according to all learning subjects ( $p < 0.05$ ) but a difference in confidence level occurred in level C- 7th semester residents ( $p < 0.05$ ).

**Conclusion:** The combination of videos and mannequin simulations is the best method for increasing knowledge of cesarean sections, compared to single video and mannequin simulations. The confidence level has been shown to increase in all subject studies but the effectiveness at each level of resident needs to be investigated further.

## 1. Introduction

Cesarean delivery rates are increasing worldwide [1–3]. When performing a safe cesarean section, doctors are required to have

proper and adequate practice [4,5]. Training in surgery was an important component of obstetrics and gynecology resident education, to serve optimum care for patients [6]. COVID-19 is an obstacle for medical students because they have to learn several special skills when providing care to patients in health facilities [7,8]. The education system needed to be reconstructed to react to this pandemic influence [9,10]. COVID-19 pandemic made some interruptions in training experiences among residents of obstetrics and gynecology [11]. Health services with patients directly become constrained because of restrictions on the mobility of people around the world. As a solution, online teaching was introduced to decrease physical contact and minimalizing COVID-19 transmission [12]. However, medical students argued that this method decreased study outcome quality, the emergence of psychological disorders, and fatigue [7, 13,14]. In addition, online learning demonstrated low technical skills of the students and social interaction [15]. They experienced a limited session of clinical supervision from lecturers [16]. As a result, this phenomenon significantly causes medical students to get lower grades than expected grades [17].

Online learning is useful for sharing knowledge [18]. However, this method did not accommodate clinical skill practice. The other learning methods were required to achieve clinical skill competencies. Mannequin simulation and video tutorials could be alternative approaches in educational institution [19]. The limited number of mannequins causes simulations using mannequins to be carried out by students at the same location and time [20].

Video tutorials and mannequin simulations were compared for effectiveness in several studies [19,20]. Previous research revealed that virtual media was more effective technique compared to face-to-face learning method [20]. Otherwise, mannequin simulation is assumed to greatly improve students' clinical skills instead of virtual coaching [21]. A systematic review explained that the combination of online and face-to-face learning substantially enhanced students' knowledge [22]. Blended learning was proven to increase medical students' understanding and clinical capability [23,24]. According to these explanations, the purpose of this study was to identify the effect of video, mannequins, and the combination of video mannequins on residents' knowledge and confidence regarding cesarean section.

## 2. Method

### 2.1. Ethics statement

The study's ethical consideration was approved by the research ethical committee of Dr. Soetomo General Academic Hospital No. 0273/KEPK/X/2021.

### 2.2. Study design

This research is a quasi-experimental research with pre-test and post-test designs. The research was carried out in the Department of Obstetrics and Gynecology at Dr. Soetomo General Academic Hospital-Faculty of Medicine Universitas Airlangga Indonesia from April until November 2021. The independent variables were the cesarean section training using mannequins, video, and mannequin-video combination. The dependent variable was the resident's knowledge and confidence in doing a cesarean section.

### 2.3. Study participant

This study involved 33 residents of Obstetrics and Gynecology at the Faculty of Medicine Universitas Airlangga Indonesia. Study participant were chosen using stratified proportional random sampling according to inclusion criteria. The inclusion criteria were residents who had not carried out independent cesarean sections as an operator. All participants were required to be in their 5th or 8th semester. The participant would be excluded if they did not follow all the sessions of cesarean section lectures and had been infected by COVID-19 during the research process.

**Fig. 1.** The prototype of the abdominal organ.

## 2.4. Research instruments

Research instruments used mannequins and video as learning media. This study collaborated with a team of Design Product Experts from Institut Teknologi Sepuluh Nopember Indonesia to construct the mannequins. Institut Teknologi Sepuluh Nopember is a university that focuses on technology development. The prototype designed according to the Netter Atlas of Anatomy took 8 months to produce. The mannequin models included an abdominal organ (Fig. 1); a set of babies, an umbilicus, a placenta (Fig. 2); and a uterus (Fig. 3). Fig. 1 showed that the abdominal prototype was using for incising the lower uterine segment and expelling the baby. Fig. 2 showed that the umbilical cord is made using disposable silicone so that it can be replaced with another when cutting is done, while for babies and placenta it remains with one prototype so that it can be used repeatedly and does not damage the shape of the prototype. Fig. 3 showed that the uterus consists of the fundus and lower uterine segment for suturing.

Mannequins were formed as like the actual structure of the human body using basic materials from *liquid latex*, *silicone rubber RTV 48*, and a round *neodymium* magnet. A virtual video was made by researchers using a mannequin model that had been made and a caesarean section checklist that was implemented at the Department of Obstetrics and Gynecology, Faculty of Medicine, Universitas Airlangga. The 13-min video will be played 2 times. The content of the video is tutorials on practical cesarean sections using mannequins.

Study participant knowledge regarding caesarean section was assessed using pre-test and post-test questionnaires. The questionnaire was tested for validity and reliability with Cronbach's alpha on those who were not study participant. The results of the validity and reliability tests obtained 15 valid and reliable questionnaire questions. The questions in the questionnaire consist of abdominal organ anatomy, indications for caesarean section, and surgical techniques. The questionnaire was written in Indonesian and then translated into English (translated by author). Measurement of resident confidence in carrying out caesarean section was carried out using pre-simulator and post-simulator questionnaires. Study participants were asked to answer five questions with 4 levels of the Likert scale, namely very poor, poor, enough and good. The confidence questionnaire was tested for validity and reliability based on the professional judgment of 2 obstetricians and gynecologists. The questionnaire can be found in the supplementary file.

## 2.5. Research procedures

Stratified random sampling was performed in assigning the respondents into the three groups. Strata are formed based on the similarity of attributes or characteristics of members, in this study, namely the level of resident education. The first group received a video tutorial about caesarean section procedures. The first group was given knowledge and confidence assessment regarding caesarean section then the video is played for 13 min 2 times. Study participants were then asked to fill out a post-test questionnaire. The second group received a mannequin models simulation. The second group underwent a knowledge and confidence assessment and then demonstrated using a caesarean section mannequin model. Study participants also tried caesarean section techniques on the model at least 2 times. After being given a demonstration of a simulation model and experiments with mannequins, the research subjects were assessed by completing knowledge test posts and self-confidence assessments. The third group received a combination of video tutorials and mannequin simulation. The third group underwent a knowledge and confidence assessment. After filling out the questionnaire, a 13-min video was played, accompanied by a demonstration using caesarean section mannequin model. Study participants also tried caesarean section techniques on the model at least 2 times. After that, study participants were then asked to fill out a post-test questionnaire. Pretest and posttest assessments are given in all group 1 week apart. To prevent participants from sharing material such as videos, the researcher played the video using zoom for two views and then was given an evaluation questionnaire. There were 2 resident in group 2 who dropped out because of COVID-19.

## 2.6. Data analysis

Data were analyzed descriptively and statistically. Residents are divided into several levels, namely level A, B, C, and senior level. Level A is a 5th semester resident, level B is a 6th semester resident, level C is a 7th semester resident and senior level is an 8th semester resident. Clinical experience is divided into 2, namely <3 years and >3 years. The intended clinical experience is generally practice in

Fig. 2. A baby prototype set (including baby, placenta, and umbilical).

**Fig. 3.** The uterus prototype.

obstetrics and gynecology such as in pregnancy care, oncology, etc. The data would be analyzed statistically using SPSS 26.0 application. Pre-test and post-test data were analyzed using the Wilcoxon Signed-Rank Test (significant at  $p < 0.05$ ). The data were also tested using the Kruskal Wallis Test (significant at  $p < 0.05$ ). Lastly, this study uses the Mann-Whitney test to examine the effect between the 2 variables (significant at  $p < 0.05$ ).

### 3. Results

#### 3.1. Respondent's characteristics

The age of the respondents ranged from 28 years to 38 years. Study participants are divided proportionally according to their level. Although the number of residents from Levels A to C varies, this study places 2 senior residents in each group. This study mostly involved male residents. Most study participants had more than 3 clinical experiences in hospitals related to obstetrics and gynecology. This study found that Level B and Level C residents had less clinical experience. Age, level, gender and clinical experience were not statistically different (see [Table 1](#)).

#### 3.2. Resident's knowledge and confidence

All study participant demonstrated enhanced knowledge of cesarean section after obtaining the interventions. Statistical analysis presented  $p < 0.05$  ( $p = 0.038$ ), which pointed out that mannequin simulation, video tutorial, and the combination of video-mannequin simulation could be an effective method (see [Table 2](#)). Third group showed significant differences between the pre-test and post-test (1.3 (CI95%0.73–1.93)). First group and second group presented slight mean differences (0.42 (CI95%-0.11–0.9) vs. 0.60 (CI95%-0.04–1.25)). [Table 2](#) was data from questionnaire 1: Knowledge pretest and posttest questionnaire (see supplementary file).

Respondents also showed increased scores regarding confidence in their caesarean section skills according to learning subjects ( $p < 0.05$ ). A significant difference occurred in level C residents who were more confident after the intervention (mean = 1.07). All study participants presented an average difference of more than 0.05 in the subjects studied (see [Table 3](#)). The confidence level regarding cesarean section procedures during the pre-test remained low with a score of 2.8. This score has elevated to 3.4 in the post-test. [Table 2](#) was data from questionnaire 2: pre-simulator survey sheet and post survey simulator confidence (See the supplementary file).

**Table 1**  
Respondent's characteristics.

Demographic	Group			p-value
	Group I (Video)	Group II (Mannequins)	Group III (Combination)	
Age (years)	31 (28–36)	32 (29–38)	30 (28–34)	0.174
Resident Level				
Level C	2 (18.2%)	2 (18.2%)	4 (36.4%)	
Level B	3 (27.3%)	3 (27.3%)	2 (18.2%)	
Level A	4 (36.4%)	4 (36.4%)	3 (27.3%)	
Senior Level	2 (18.2%)	2 (18.2%)	2 (18.2%)	0.797

Mean's Differences	0.4 (CI95%-0.1-0.9)		0.6 (CI95%-0.0-1.2)		1.3 (CI95%0.7-1.9)		

## 4. Discussion

### 4.1. Key result

The combination of video tutorials and mannequins was the most effective media to increase residents' knowledge significantly. Confidence level increases significantly only occurred in 7th semester residents or level C.

### 4.2. Interpretation

The video tutorial and mannequin simulation combination significantly improved residents' knowledge about cesarean section surgery. Compared to the single intervention of video and mannequin simulation, this combination showed the highest improvements in residents' cesarean section understanding. This result was supported by previous research, which mentioned that the integrated simulation method and video tutorial escalated cognitive and clinical abilities compared to the single learning method, especially for health professionals and medical students [25–27]. Although it would be influenced by several factors, this combination method improved the theoretical knowledge of residents [23]. Blended virtual video and face-to-face simulation was considered to be an effective approach to link theoretical knowledge and clinical practice [23,24]. The combination of video and mannequin simulation could be an appropriate method to advance cesarean section knowledge for obstetrics and gynecology residents.

The intervention using a single mannequin simulation also displayed knowledge enhancement. According to the study result, this research disclosed that mannequin simulation showed better influence to increase understanding, instead of video tutorial. Previous literature reviews mentioned that this mannequin became an excellent simulation media [28]. Furthermore, a recent study claimed cesarean section practice using mannequin simulation demonstrated important knowledge improvement, particularly in suturing ability [29]. Simulation of clinical practice improved performance more than a single video tutorial in medical students [19]. This method allowed residents to gain experiment chances repeatedly along with a minimum stress environment [29]. Simulation using a mannequin is considered as a complementary medium for learning caesarean section, because the mannequin can be adjusted similar to the management of patients [30].

Video tutorial intervention demonstrated knowledge development, even though it displayed the lowest enhancement score. A study endorsed that online learning was able to improve students' knowledge and skill [10]. This method provided diseases explanation and became an alternative media to practice residents' communication ability [7,31]. Nevertheless, this tutorial video was inadequate to improve clinical ability as the residents did not have any opportunity to try a caesarean section using actual media [7, 31]. These reasons led to the low improvement score of this group's intervention. Virtual video authorized the residents to explore their audio and visual senses but did not improve their practical competencies. The use of video tutorials as a medium to reach cesarean section competency was not commonly carried out in frequent courses, however, it was employed as an additional method in a real cesarean section preparation [28].

Educational intervention for residents essentially escalated their self-confidence in doing surgery [32]. This study found that video and mannequin simulation increased residents' self-confidence levels in the cesarean section only in 7th semester resident. Research confirm that intervention using virtual video was suitable as a media to elevate self-confidence of surgery competency [33]. In addition, the mannequin simulation developed residents' self-confidence, so it caused a relaxed and calm situation among residents [30]. Developments in simulation technology can help improve the operating experience [34]. Surgery learning at university levels presented an association with low confidence during surgery performance [34]. The type of clinical training program and the kind of

**Table 3**  
Respondent's confidence level.

	Pre-test	Post-test	Mean Differences	p value
<b>Learning subjects</b>				
Instrument understanding	3.0	3.5	0.5	<0.001
Structure of abdominal wall	3.0	3.6	0.5	<0.001
Caesarean section procedure	2.8	3.4	0.6	0.001
Suturing	3.1	3.7	0.5	<0.001
<b>Residents Level</b>				
Level C	2.4	2.5	1.0	0.026
Level B	3.0	3.2	0.1	0.301
Level A	3.2	3.6	0.3	0.058
Senior Level	3.2	3.7	0.4	0.068

hospital also affected the confidence in their surgery ability [35]. The number of surgery performances could develop residents' confidence to perform a surgery independently [35]. Training programs by forming groups of 4–5 residents can increase operating confidence [34].

#### 4.3. Limitation and recommendation

This research is an initial study that learn the effect caesarean section mannequins in medical learning. This study was a single center study with a small sample size so further investigation is needed. This study also has not examined the difference in scores on the pre-test in interpretation. In addition, there may be bias in the use of the questionnaire. The recommendation for further research is that although knowledge and confidence were investigated in this research, it may be useful to follow up on the resident subsequent performance in clinical practice to evaluate long-term.

## 5. Conclusion

The combination of videos and mannequin simulations is the best method for increasing knowledge of cesarean sections, compared to single video and mannequin simulations. The confidence level has been shown to increase in all subject studies but the effectiveness at each level of resident needs to be investigated further.

Budi Utomo: Analyzed and interpreted the data; Contributed reagents, materials, analysis tools or data; Wrote the paper.

#### Funding statement

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

#### Data availability statement

Data included in article/supplementary material/referenced in article.

#### Declaration of interest's statement

The authors declare no conflict of interest.

#### Acknowledgment

This study would like to give high gratitude to the team of Design Product Experts of Sepuluh Nopember Institute of Technology Indonesia for the mannequin production during this study.

#### Appendix A. Supplementary data

Supplementary data to this article can be found online at <https://doi.org/10.1016/j.heliyon.2023.e13907>.
