Editorial office

Acta Medica Indonesiana

Dear Sir or Madam,

Please find enclosed our manuscript entitled "The
dominance of CRF01_AE and the emergence of drug
resistance mutations among antiretroviral therapy-
experienced, HIV-1-infected individuals in Medan,
Indonesia" by Indriati, D. W. et al., to be considered for
publication as an original article in *Acta Medica
Indonesiana*.

We herein conducted a genotypic study on HIV-1 drug
resistance among antiretroviral therapy (ART)-experienced
individuals residing in Medan, the capital city of North
Sumatra province, Indonesia. We found drug resistance-
associated major-mutations for reverse transcriptase
inhibitors in 8 out of 28 samples (21.4%) and a major
mutation for protease inhibitors in 1 out of 31 samples
(3.1%). These results indicate the emergence of drug
resistant viruses among ART-experienced individuals in
Medan. HIV-1 subtyping also revealed that CRF01_AE
viruses were the dominant strains of HIV-1 prevalent in the
region. Furthermore, we found an atypical circulating
recombinant form of HIV-1, CRF02_AG in the region. We
consider the present results to provide important
information for the implementation of efficient ART in
Indonesia.

Thank you for your consideration.

We look forward to your reply.

The following message is being delivered on behalf of Acta Medica
Indonesiana - The Indonesian Journal of Internal Medicine

Masanori Kameoka:

Thank you for submitting the manuscript, "The dominance of CRF01_AE and the
Emergence of Drug Resistance Mutations among Antiretroviral
Therapy-Experienced, HIV-1-infected individuals in Medan, Indonesia" to Acta
Medica Indonesiana. With the online journal management system that we are
using, you will be able to track its progress through the editorial process
by logging in to the journal web site:

Manuscript URL:

<http://www.actamedindones.org/index.php/ijim/author/submission/1429>
Username: mkameoka

If you forget or do not know your password, you can contact us by email or
use the link to reset your password (which will then be emailed to you along
with your username).

<http://www.actamedindones.org/index.php/ijim/login/lostPassword>

For your information, the first selection process is an initial check of the
minimum submission criteria. Then, your manuscript will be reviewed by the
Acta Medica Indonesiana Selection Team Board. Please allow for a minimum
period of 10-12 months for the review process to be completed. We will
inform you about the outcome of the review shortly after the evaluation
process has completed.

Thank you for considering this journal as a venue for your work.

Regards,
Sudiarindini Sudarto

Full Text:378

Reviewer 1: Introduction:

1. Second line: use a comma instead of a dot in 232.323 cases, i.e. 232,323.
2. Please add the "Indonesian" Ministry of Health in the second paragraph of the Introduction.
3. Suggest changing the sentence "The invention of antiretroviral therapy (ART) has greatly reduced HIV-1 mortality." to "Antiretroviral therapy (ART) has greatly reduced HIV-1 mortality."

Results and Discussion:

4. Section 3.3 it is mentioned that the percent of AZT, 3TC and NVP was 45.3%. Indeed, 24 out of 53 is 45.3%, however in Table 2 it says 44.3% - please correct the Table. Likewise, in the Table it says that >56.6% were receiving ART more than 3 years (which seems correct), but in the text it says 50%. Please be consistent.
5. No reference to Table 4 is made in the main text.

Reviewer 2: The Authors of this manuscript have presented a report of HIV subtypes and 28% RT HIV Drug resistance mutations among a mixed small population of 60 subjects comprising 53 ARV experiences adults and infants; and 7 ARV naïve subjects ?Adults.

The abstract, approach, results, discussion and reference sections of the manuscripts require revisions which have been indicated above.

The Title of Table 4 indicates ARV Naïve individuals which were stated in the text as 7 in number but the table shows n=46. This is confusing and should be addressed.

SK PENERBITAN NASKAH

Nomor: 041 / IJIM / PP.IPD / XII / 2020

Kami menerangkan bahwa naskah berjudul "*The dominance of CRF01_AE and the emergence of drug resistance mutations among antiretroviral therapy-experienced, HIV-1-infected individuals in Medan, Indonesia*", akan diterbitkan pada Jurnal ACTA MEDICA INDONESIAANA - *The Indonesian Journal of Internal Medicine* **Volume 52 Nomor 4 / Oktober - Desember 2020** dalam rubrik *original article*.

Sehubungan dengan hal tersebut, untuk membantu biaya penerbitan dan pencetakan jurnal, mohon kiranya penulis dapat membayarkan biaya publikasi sebesar Rp. 7.500.000,- (tujuh juta lima ratus ribu rupiah). Biaya tersebut dapat ditransfer melalui rekening Bank Mandiri cabang RSCM Jakarta a.n. Perkumpulan Informasi dan Penerbitan, nomor rekening 122-00-0767711-8. Mohon email bukti transfer setelah pembayaran dilakukan.

Kami informasikan bahwa saat ini naskah sedang melalui proses review tahap akhir. Apabila pada proses tersebut masih dibutuhkan koreksi untuk penyempurnaan naskah, diharapkan Penulis bersedia memperbaiki dalam waktu singkat sebelum *dateline* penerbitan jurnal.

Demikian surat keterangan ini kami sampaikan. Terima kasih atas perhatian dan kerja sama Sejawat.
