This is a well-written and interesting manuscript that rises to be a pressing AMR issue which could be a global threat. There is a minor remark in the title of Tables 3 and 4 (incomplete spelling; <i>microorganism</i>) and use a hyphen in beta-lactam (page 6 line 35). Then, In Discussion, it should be stated a little bit about the virulence factor of <i>Enterococcus</i> (optional). Overall, I believe this manuscript merits publication and no clinical question.
