Right Bundle Branch Block Evolving to Myocardial Ischemia in a Patient with Chronic Middle Back Pain: A Case Report
Meity Ardiana; Inna Maya Sufiyah; Muhammad Nuh Hamdani
Journal of Medical Case Reports

Dear Dr. Ardiana,

Your manuscript 'Right Bundle Branch Block Evolving to Myocardial Ischemia in a Patient with Chronic Middle Back Pain: A Case Report' (JMCR-D-23-00045R1) has been assessed by our reviewers. Based on these reports, and my own assessment as Editor, I am pleased to inform you that it is potentially acceptable for publication in Journal of Medical Case Reports, once you have carried out some essential revisions suggested by our reviewers.

Their reports, together with any other comments, are below. Please also take a moment to check our website at <https://www.editorialmanager.com/jmcr/> for any additional comments that were saved as attachments.

Once you have made the necessary corrections, please submit a revised manuscript online at:

<https://www.editorialmanager.com/jmcr/>

If you have forgotten your username or password please use the 'Send Login Details' link to get your login information. For security reasons, your password will be reset.

Please include a point-by-point response within the 'Response to Reviewers' box in the submission system and highlight (with 'tracked changes'/coloured/underlines/highlighted text) all changes made when revising the manuscript. Please ensure you describe additional experiments that were carried out and include a detailed rebuttal of any criticisms or requested revisions that you disagreed with. Please also ensure that your revised manuscript conforms to the journal style, which can be found in the Submission Guidelines on the journal homepage.

Please note, if your manuscript is accepted you will not be able to make any changes to the authors, or order of authors, of your manuscript once the editor has accepted your manuscript for publication. If you wish to make any changes to authorship before you resubmit your revisions, please reply to this email and ask for a 'Request for change in authorship' form which should be completed by all authors (including those to be removed) and returned to this email address. Please ensure that any changes in authorship fulfil the criteria for authorship as outlined in BioMed Central's editorial policies (<http://www.biomedcentral.com/about/editorialpolicies#authorship>).

Once you have completed and returned the form, your request will be considered and you will be advised whether the requested changes will be allowed.

By resubmitting your manuscript you confirm that all author details on the revised version are correct, that all authors have agreed to authorship and order of authorship for this manuscript and that all authors have the appropriate permissions and rights to the reported data.

Please be aware that we may investigate, or ask your institute to investigate, any unauthorised attempts to change authorship or discrepancies in authorship between the submitted and revised versions of your manuscript.

The due date for submitting the revised version of your article is 18 Feb 2023.

We look forward to receiving your revised manuscript soon.

Best wishes,

Sasmit Roy, M.D
Journal of Medical Case Reports

Reviewer reports:

Reviewer #2: 1. Do you believe the case report is authentic?

Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments: Yes

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:

- De-identified demographic information (age, gender, ethnicity)
- Main symptoms of the patient
- Medical, family and psychosocial history
- Relevant past interventions and their outcomes

b. The relevant physical examination findings

c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at T = 0, follow up at T = 1 month.

d. Diagnostic assessments, including:

- Diagnostic methods
- Challenges (e.g., financial, language/cultural)
- Reasoning and prognostic characteristics (e.g., staging), where applicable

e. Types and mechanism of intervention

f. A summary of the clinical course of all follow-up visits

Comments: Yes, author has changed all the reviewer comments

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments: Yes

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments: Yes

8. Does the case represent a useful contribution to the medical literature?

Comments: Yes

9. Additional comments for the author(s)?

Reviewer #3: 1. Do you believe the case report is authentic?

Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments:

No

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:

- De-identified demographic information (age, gender, ethnicity) Yes
- Main symptoms of the patient Yes
- Medical, family and psychosocial history Yes
- Relevant past interventions and their outcomes Yes

b. The relevant physical examination findings

Yes

c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient identification, consider including time relevant to initial presentation, i.e. initial presentation at T = 0, follow up at T = 1 month.

Yes

d. Diagnostic assessments, including:

- Diagnostic methods : Yes
- Challenges (e.g., financial, language/cultural): Yes
- Reasoning and prognostic characteristics (e.g., staging), where applicable: Yes

e. Types and mechanism of intervention

Yes

f. A summary of the clinical course of all follow-up visits

Comments: NA

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments:

Yes

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments:

Yes

8. Does the case represent a useful contribution to the medical literature?

Comments:

Yes

9. Additional comments for the author(s)?

Good job with the presentation.

Reviewer #4: 1. Do you believe the case report is authentic?

Yes

2. Do you have any ethical concerns? Please consider if local Institutional Review Board approval or ethical approval was obtained (if appropriate) and if the patient (or their parent or guardian in the case of children under 18) gave written, informed consent to publish this case and any accompanying images. A statement to this effect should appear in the manuscript.

Comments: None

3. Does the Introduction explain the relevance of the case to the medical literature?

Yes

4. Does the article report the following information? Where information is missing, please specify.

a. The relevant patient information, including:

- De-identified demographic information (age, gender, ethnicity)
- Main symptoms of the patient
- Medical, family and psychosocial history
- Relevant past interventions and their outcomes

b. The relevant physical examination findings

c. Important dates and times in this case (if appropriate, organized as a timeline via a figure or table); if specific dates could lead to patient

identification, consider including time relevant to initial presentation, i.e. initial presentation at T = 0, follow up at T = 1 month.

d. Diagnostic assessments, including:

- Diagnostic methods
- Challenges (e.g., financial, language/cultural)
- Reasoning and prognostic characteristics (e.g., staging), where applicable

e. Types and mechanism of intervention

f. A summary of the clinical course of all follow-up visits

Comments: Yes to all

5. Is the interpretation (discussion and conclusion) well balanced and supported by the case presented?

Comments: Yes

6. Is the anonymity of the patient protected? Please consider any identifying information in images such as facial features or nametags, whether the patient is named etc. If not, please detail below.

Yes

7. Is the Abstract representative of the case presented?

Comments: Yes

8. Does the case represent a useful contribution to the medical literature?

Comments: Yes

9. Additional comments for the author(s)?

Tq for adresing all the comments well

Reviewer #5: The authors should reponse the comments one by one. I don't see the change or reponse in the main body.

TITLE

No information in this manuscript infers "chronic" condition.

CASE PRESENTATION

1. As mentioned above, no information infers "chronic" condition.

2. What are the treatments after stent placement? What about the follow-up and prognosis?

DISCUSSION

The relationship between back pain and coronary heart disease and the differential among several sorts of back pain should be explained and discussed so that practitioners could pay attention to possible heart issues if they met patients with middle back pain.

OTHERS

The full terms should be descripted following by the abbreviations (QRS, NSAID, QS, AVF, TIMI).

Dear Dr. Ardiana,

Thank you for submitting your revised manuscript to Journal of Medical Case Reports. It has come to our attention that the author list has changed since you have revised your submission.

Before we can proceed any further, we require you to complete our 'Change of Authorship Form', found here: <https://www.biomedcentral.com/submissions/editorial-policies#authorship>. Please ensure that all authors, including those removed, sign this form. If any parts of the form are incorrectly completed then we will send this back to you for correction. The responses of all authors should be collated in one form.

Once you have completed the form, please send it back to us via email. We advise you do this as soon as possible to avoid delays in processing your manuscript.

Please be aware that we may ask your institution(s) to investigate any changes to authorship or discrepancies in authorship between the submitted, revised and accepted versions of your manuscript. In the event of an authorship dispute, the journal will refer the matter to your institution(s) to investigate.

Best wishes,

Editorial Office

Journal of Medical Case Reports

Dear Dr. Ardiana,

Your submission entitled "Right Bundle Branch Block Evolving to Myocardial Ischemia in a Patient with Chronic Middle Back Pain: A Case Report" has been received.

Before we can further process it you are kindly requested to make the following corrections to meet the journal's requirements (please also refer to the Submission Guidelines):

1. Please include a "Declarations" before the References. Please ensure that the Declarations section contains all of the following sub-sections.

All of which should have clear sub-headings:

- Ethical Approval and Consent to participate
- Consent for publication: We recommend the following wording is used for the consent section as follows: "Written informed consent was obtained from the patient for publication of this case report and any accompanying images. A copy of the written consent is available for review by the Editor-in-Chief of this journal."

- Availability of supporting data
- Competing interests
- Funding
- Authors' contributions
- Acknowledgements
- Authors' information (Optional)

If any of these sections are not relevant to your manuscript, please state "Not applicable".

Please log onto Editorial Manager as an author. The URL is <https://www.editorialmanager.com/jmcr/>.

If you have forgotten your username or password please use the "Send Login Details" link to get your login information. For security reasons, your password will be reset.

Go to the menu item 'Submissions Sent Back to Author', and click on 'Edit Submission'. If no changes are to be made in the metadata, please go to the submission step 'attach files', and upload your corrected submission. Build the PDF, view your submission, and approve the changes.

Thank you for submitting your work to this journal.

With kind regards,

Best wishes,
