Dear Colleague,

Your manuscript has been accepted for publication in *Journal of Physiology and Pharmacology* and will be published in the forthcoming issue of the journal (2023, Vol. 74, No 3).

Authors: M. ARDIANA, I.G.R. SURYAWAN, H.O. HERMAWAN, P.M. HARSOYO, I.M. SUFIYAH,
A.R. MUHAMMAD, B.S.I. ZAINI

Title: PERINDOPRIL AND LOSARTAN ATTENUATE PRO-COAGULATION FACTORS IN HUMAN ADIPOCYTES
EXPOSED TO SARS-COV-2 SPIKE PROTEIN

Manuscript No: **3942**

We have not received a fee payment, so, we kindly remind you, that the condition for publishing your manuscript is to pay a fee

Dear colleague

Enclosed you will find the galley proof of your article entitled: „Perindopril and Losartan attenuate...” which will appear soon in Journal of Physiology and Pharmacology.

Please, check the proof and make corrections in the pdf document using Acrobat Comments (or print the text, mark corrections in the printed version, than scan the pages with alterations) and send it within **4 days** by e-mail to Editorial Office. Corrections must be clear and legible. Lack of clarity means a chance for new errors. Please, pay a special attention to the correctness of the list of authors, title and affiliations. Check also, if the descriptions of graphs/axes in the figures are legible. If any

corrections in the figures or graphs are required, be sure to enclose the corrected illustration.

We have not received a fee payment, so, we kindly remind you, that the condition for publishing your manuscript is to pay a fee

Barbara Matusik <mfbmatus@cyf-kr.edu.pl>
Kepada: meityardiana@fk.unair.ac.id

Sen, 24 Jul 2023 pukul 18.14

Dear Author

We have been searching through our bank transfers once more and we found only the one unidentified payment in June (22023-06-19, from Trustly Group AB Radmansgatan, Stockholm, Sweden. The transfer description of this payment does not include the manuscript number or any information that would identify the sender), but it doesn't seem very compatible with the data you provided.

Redakcja JPP <redjpp@cm-uj.krakow.pl>
Kepada: meityardiana@fk.unair.ac.id

Sel, 6 Jun 2023 pukul 16.13

Dear Dr. Ardiana,

Your manuscript (MS # 3942-R2) has been considered by Editors of *Journal of Physiology and Pharmacology* and it is our pleasure to inform you that your work is now provisionally accepted. **Before providing us with the final version of your paper, please make sure that your paper is prepared according to our Journal Guidelines for Authors submitting to JPP and presented at our website regarding, i.e. References Section and style of Abstract.** Your Abstract does not need to be structured but instead of that, **the Method and Results sections in your Abstract need re-writing and revision for better description of all methods, parameters determined and results and correlations presented in your study for our readers.** Furthermore, please check the names of all authors, their affiliations, funding and information stated in your work acknowledgement, if any.

In addition, Editors mentioned that your paper might be enriched with two important references already published in JPP 2022; 73(2): 167-177 and JPP 2022; 73(3): 413-420. Although these references do not directly address the effects of perindopril and losartan on procoagulation factors in human adipocytes exposed to SARS-Cov-2 spike protein, which is a sole of your current manuscript, but these references deal with: 1) an emerging and new overview on pharmacological agents that may protect vascular endothelium from an attack of acute COVID-19 infection, similarly as thematically presented in your current study on the SARS-Cov-2-infected adipocytes and protection afforded by cardiovascular drugs concerning pro-coagulation factors, thus adding more information to our understanding of the physiology and pharmacology of vascular endothelium with respect to mechanism of thrombosis process, as described in your current experimental study in the adipose tissue harvested from an obese human individual donor, and 2) the valuable and relatively less promising and not widely explored original clinical evidence on the potent anti-inflammatory effect of colchicine therapy that studied non-ICU hospitalized COVID-19 patients comparing standard of care (SOC) patients infected by this virus suggesting that colchicine might not be essentially involved in offering a health benefit, especially in non-ICU patients as assessed by several biomarkers including blood pro-coagulation factors, you have demonstrated, analyzed and discussed in your current experimental study with isolated human adipocytes infected with SARS-Cov protein. As these additional relatively novel evidences but also clinically-relevant observations will allow our readers in the fields of physiology and pharmacology to gain a better mechanistic insights into the pathophysiology of COV-2 infection with some elements to practical understanding of the potential factors and mechanisms as well as vascular and pulmonary targets of pharmacotherapy that has been currently reported under both experimental and clinical conditions, all these aspects that you also directly and indirectly touched upon in your present original experimental work, we believe to discuss these two articles, and we feel that a brief commentary may be needed, which *at least* partially refers to the current topic of your original work performed in human adipocytes infected with CoV-2 protein.

We request the revised version of your **MS # 3942-R3 in Word** (not PDF!!!) send to us by e-mail within 2-3 days, or earlier along with Figures and Tables each attached as a single separate file.

Best regards,

Sincerely,

Prof. Tomasz Brzozowski

Dear Dr Ardiana,

This a short note that your revised version of MS # 3942-R3 is now accepted for publication in *Journal of Physiology and Pharmacology*.

In addition, we remind that you are owing us the handling fee for the MS # 3942-R3.

We booked the journal space for your article (MS # 3942-R3) in the current volume of the Journal. Not receiving your wire Bank transfer in next few days may results in the removal of your paper from this next volume of our Journal, thus generating time delay. Moreover, your article might be replaced with another paper waiting in the line to be published.

If you just paid off this handling fee for your article to our Bank account, then please not take into account this notice but send us the Bank transfer proof (scan) instead.

Please contact us immediately with your response to this mail.

Fee (**500 EURO**)/ **2100 PLN**) is payable via bank transfer in polish currency (PLN) with use of **Polskie Towarzystwo Fizjologiczne** (Polish Physiological Society) as a name of recipient.
