[JVHS] Editor Decision

2023-03-20 11:33 AM

imam susilo, Bilqisthi Ari Putra, Ahmad Yudianto:

We have reached a decision regarding your submission to Journal of Vocational Health Studies, "Effect Length of Death Due Anaphilatic Shock β-Tryptase Expression and Chymase Heart Mast Cells : Pengaruh Lama Kematian Akibat Syok Anafilatik Terhadap Ekspresi β-Tryptase dan Chymase Sel Mast Jantung".

Our decision is to: Resubmit for Review

Below are the feedbacks from the two reviewers;

Reviewer A:

1. Introduction: The importance of the research should be written first. Paragraph 6-7 can be moved to the first paragraph. It should mention why it is important to perform this study in the first place.
2. Introduction: The research gaps in unclear and should be added. Is there any prior studies looking at the β-Tryptase and Chymase Expression of Anaphylactic Heart Mast Cells in post mortem before? What are the limitations of those studies? And how this study can address those limitations?
3. Methods: Provide the sample calculations. Five samples do not have enough statistical power for sample calculation.
4. Provide the statistical analysis used in the Method section. Explain the reason of choosing that analysis method.
5. Results: The Figures and Results should be explained in the Paragraphs, not only displayed.
6. Discussion: The discussions on how the findings compared to prior studies should be defined.
7. Limitations and strengths of the study should be mentioned and explained.
