xviii+66 halaman, 9 lampiran

Penelitian ini bertujuan untuk mengetahui perbedaan gaya penyelesaian konflik antara suami dan istri pada pasangan dual earner family. Gaya penyelesaian konflik merupakan sekumpulan pola respon atau sekumpulan tingkah laku yang ditampilkan individu dalam menghadapi konflik. Gaya penyelesaian konflik terdiri dari avoidance style, competition style, compromise style, accomodation style, dan collaboration style, sehingga dalam penelitian ini akan diselidiki sebuah pertanyaan yaitu apakah terdapat perbedaan gaya penyelesaian konflik antara suami dan istri pada pasangan dual earner family.

Penelitian ini dilakukan pada pasangan suami istri dimana keduanya sama-sama bekerja/mencari penghasilan (dual earner family) dengan jumlah subyek penelitian sebanyak 32 pasangan atau sama dengan 64 orang subyek. Alat pengumpul data berupa kuesioner gaya penyelesaian konflik sebanyak 24 butir yang disusun sendiri oleh penulis. Analisis data dilakukan dengan teknik statistik deskriptif dan Chi Square dengan bantuan program statistik SPSS versi 16.

Dari hasil analisis data penelitian diperoleh nilai Chi Square sebesar 25,000 dan nilai probabilitas sebesar 0,406. Hal ini menunjukkan bahwa tidak ada perbedaan gaya penyelesaian konflik antara suami dan istri pada pasangan dual earner family.

Kata kunci: gaya penyelesaian konflik, dual earner family

ABSTRACT

Andina Nurmadiani, 110710028, Conflict Resolution Style Differences between Husband and Wife In *Dual-earner Family*, Thesis, Faculty of Psychology, University of Airlangga, 2012.
xix+66 pages, 9 appendixes

This study aims to determine the differences in conflict resolution style between husbands and wives in dual-earner family. Style of conflict resolution is a set pattern of response or set of behaviors presented individually to face of conflict. The styles consist of avoidance style, competition style, compromise style, accommodation style, and collaboration style. Therefore the study attended to answer a question of whether there are differences in the style of resolving conflicts between husbands and wives in dual-earner family.

The subjects of this research were 32 couples of dual earner family, therefore the total subject were 64 subjects. The data was collected from those subjects using a questionnaire of conflict resolution style 24 items. Data analysis was done by using descriptive statistics and Chi Square with the help of a statistical program SPSS version 16.

Research data using Chi Square analysis showed the value of 25,000 and the probability value of 0,406. Therefore there is no difference in resolving conflict between husbands and wives as dual earner family.

Key words: *conflict resolution style, dual-earner family*
