Acknowledgement

This thesis is arranged to fulfill the requirements of the Sarjana Degree in the University of Airlangga, Surabaya. It deals with literature with a play as the object of study. In particular, the aspect studied is the 'Jealousy' in Shakespeare's Julius Caesar. In the analysis, there will be found such a discussion upon the matter observed from the literary point of view. Through the analyses of the dramatic elements of the play itself, I'd like to reveal out the phenomena of the existence of the ill feeling. Indeed, I want to make a proof on the righteousness of the hypothesis that it is the ill feeling of an old friend that causes the assassination of Julius Caesar in this play.

On this occasion, I would like to thank some people who have given me support in delivering this thesis into existence. Especially I thank drs. Sumitro, my thesis adviser, for the help, guidance, patience and understanding that this thesis can be arranged in a good order. I also thank my good friends and my beloved parents and brothers for the love, understanding, help and support that this thesis can be finished in order. And I also thank everybody else that cannot be mentioned in particular for the help I have ever had.

I really hope this thesis will be useful for us, especially for those who are dealing with the same subject. I realize that this thesis is simply not perfect since the data are very limited. In relation, your criticisms and advice will be appreciated.
