

## CHAPTER IV

### CONCLUSION

Based on analyzing of the data, kind of cohesive devices that is mostly found in *The Jakarta Post* is endophora anaphoric personal reference. The total of this kind of device is 126 or 42.7 %. From data 1, there are 26 endophora anaphoric personal reference; from data 2, there are 11 endophora anaphoric personal reference; from data 3, there are 12 endophora anaphoric personal references; from data 4, there are 3 endophora anaphoric personal references; from data 5, there are 11 endophora anaphoric personal references; from data 6, there are 11 endophora anaphoric personal references; from data 7, there are 7 endophora anaphoric personal references; from data 8, there are 10 endophora anaphoric personal references; from data 9, there are 8 endophora anaphoric personal references; from data 10, there are 12 endophora anaphoric personal references; from data 11, there are 12 endophora anaphoric personal references; from data 12, there are 9 endophora anaphoric personal references. It can be seen that each data always consist of this kind of reference. The reason why endophora anaphoric personal reference is mostly used is to reduce repetition in the text.

Meanwhile, the kinds of cohesive devices that are found less frequently are endophora cataphoric personal reference, endophora anaphoric demonstrative reference, causal conjunction, temporal conjunction, hyponym and antonym. For endophora cataphoric reference, endophora anaphoric demonstrative reference, causal conjunction, temporal conjunction and antonym, there are 3 or 1.01%.

Besides, for hyponym, there are only 1 or 0.3%. Endophora cataphoric reference is found 1 in data 1, 1 in data 9 and 1 in data 11. For endophora anaphoric reference, there are found 2 in data 7 and 1 in data 9. Causal conjunction is found 2 in data 1, 1 in data 3. For temporal conjunction, there are found 1 in data 1 and 2 in data 12. Antonym is found 1 in data 2, 1 in data 4, 1 in data 5. For hyponym, there are found only 1 in data 8. In addition, kinds of cohesive devices that are never found are endophora anaphoric comparative reference and substitution. So, kinds of cohesive devices that are less or never found are endophora cataphoric personal reference, endophora anaphoric demonstrative reference, causal conjunction, temporal conjunction, hyponym, antonym, endophora anaphoric comparative reference and substitution. The reason why these kinds of cohesive devices are less or never found in *The Jakarta Post* headlines is complexity.
