## ACKNOWLEDGMENTS

First of all, all praises and gratitude be to God the Almighty who always helps me with His blessing and caring all the time.

During the time of research and writing, I have been generously assisted by a number of persons. My particular gratitude is attended to Mr. Husein Shahab for all his time, patience, guidance, and encouragement in helping me finishing this thesis. I would also like to express my gratitude to Mr. Hariawan Adji for being my ‘second advisor’ and for lending me many books during this research. My appreciation goes also to all lectures that have taught me during my study in English Department.

More importantly, I wish to appreciate my deepest gratitude to my beloved parents for teaching me to believe in myself and for always encouraging me to do my best. My eternal love goes to my dearest brothers and sister, Kadek, Reni, Dedi. Thanks a lot for your support and all of the joy and laughter we share together. I love you, guys!

A very special thank goes to all my friends in English Department, especially Fifi '93, for giving me such a brilliant idea, Titik, for her friendship and kindness, Fitri and Naning, for being my ‘second statistic advisors’, and lastly Yeny and Eteng, for being my best friends. Finally, I would like to thank greatly to Luqman Farid. You’re truly my very best friend. There is not enough room on this page to even begin to thank you for everything you’ve done for me. So I’ll just say thank you for making my life so beautiful in every way.
