Dear Soebagidjo,

We have received your article "Perioperative Management of Closed Fracture Intertrochanter Femur Sinistra in Type 2 Diabetes Mellitus with Multiple Comorbid: A Case Report" for consideration for publication in **International Journal of Surgery Case Reports**.

Your manuscript will be given a reference number once an editor has been assigned.

To track the status of your paper, please do the following:

1. Go to this URL: <https://www.editorialmanager.com/ijscasereports/>
2. Your username is: [soebagijo1121@gmail.com](mailto:soebagijo1121@gmail.com)  
If you need to retrieve password details, please go to: <https://www.editorialmanager.com/ijscasereports/l.asp?i=697114&l=CUA3OJ40>.
3. Click [Author Login]  
This takes you to the Author Main Menu.
4. Click [Submissions Being Processed]

Thank you for submitting your work to this journal.

Kind regards,

Editorial Manager  
**International Journal of Surgery Case Reports**

Title: Perioperative Management of Closed Fracture Intertrochanter Femur Sinistra in Type 2 Diabetes Mellitus with Multiple Comorbid: A Case Report  
International Journal of Surgery Case Reports

Dear Mr Soelistijo,

Reviewers have now commented on your paper. You will see that they are advising that you revise your manuscript. If you are prepared to undertake the work required, we would be pleased to reconsider our decision.

For your guidance, reviewers' comments are appended below.

If you decide to revise the work, please submit a list of changes or a rebuttal against each point which is being raised when you submit the revised manuscript.

To submit a revision, please go to <https://www.editorialmanager.com/ijscasereports/> and login as an Author.

Your username is: [soebagijo1121@gmail.com](mailto:soebagijo1121@gmail.com)

<https://www.editorialmanager.com/ijscasereports/l.asp?i=715992&l=40SUJ8XX>

On your Main Menu page is a folder entitled "Submissions Needing Revision". You will find your submission record there.

Finally, we would appreciate if you could submit your revised paper by Aug 11, 2022.

Yours sincerely,

The Editors

International Journal of Surgery Case Reports

Have you considered publishing a protocol for your next study? You can now publish your study protocol with IJS Protocols, our pioneering new journal for surgical protocols, visit <http://www.ijsprotocols.com> for more details.

Reviewers' comments:

Managing Editor

Please can you make the following changes/checks:

1. Please ensure your case report is compliant with the SCARE Guidelines 2020: <http://www.scareguideline.com> and submit a completed SCARE 2020 checklist.

Please pay particular attention to the following criteria which are often missed:

- Who performed the procedure? (item 9d)
- patient perspective (item 12)
- Drug history, family history including any relevant genetic information, and psychosocial history (item 5d)
- Where relevant - intervention adherence and tolerability (item 10c)
- Post-intervention considerations (item 9f)

Page 3

2. Please also ensure you state that the work has been reported in line with the SCARE 2020 criteria:

Agha RA, Franchi T, Sohrabi C, Mathew G, for the SCARE Group. The SCARE 2020 Guideline: Updating Consensus Surgical Case Report (SCARE) Guidelines, International Journal of Surgery 2020;84:226-230.

3. Please cite the SCARE 2020 paper above in your text in the methods section and add the reference to your references section.

4. Please ensure you submit a structured abstract with sub-headings as follows:  
Introduction and importance, Case presentation, clinical Discussion, Conclusion

5. Can you also please ensure you go through the entire manuscript and check the spelling, grammar and syntax and ensure the language is concise. If you need our author support services, you can access them here:

<https://www.ijspg.com/services/author-support>

6. Please be very clear about what this adds to the existing literature and clearly detail learning points.

7. Please ensure you submit your work with a Research Registry unique identifying number (UIN) if its first in man i.e. the first time a new device or surgical technique is performed: [www.researchregistry.com](http://www.researchregistry.com) – it can't progress without being registered. Please ensure you also state your registration UIN in your methods section and reference it including a hyperlink to it if registration is appropriate.

8. If you haven't already, please include your "highlights" which are 3-5 bullet points summarising the novel aspects and/or learning points (maximum 85 characters, including spaces, per bullet point).

9. The consent statement in the author form is not suitable. We need a statement like this:

Written informed consent was obtained from the patient for publication of this case report and accompanying images. A copy of the written consent is available for review by the Editor-in-Chief of this journal on request.

Please see consent section in instructions to authors for further information.

10. Please ensure any images/figures/photos are suitably anonymised with no patient information or means of identifying the patient.

11. Please add a Guarantor on the Author form, if you haven't already.

The guarantor is that individual who accepts full responsibility for the work and/or the conduct of the study, had access to the data, and controlled the decision to publish.

12. Please add the following statement above references:

Provenance and peer review

Not commissioned, externally peer-reviewed

13. Above references, please state the following headings with your response (if something doesn't apply, say N/a or none or none declared):

- conflicts of interest
- sources of funding
- ethical approval
- consent
- author contribution
- research registration (for case reports detailing a new surgical technique or new equipment/technology)
- Guarantor

14. Author Form

Please ensure that you have completed and uploaded the correct author form for IJS Case Reports:

[https://www.elsevier.com/\\_data/promis\\_misc/2020\\_IJSCR\\_Author\\_Disclosure\\_Form.docx](https://www.elsevier.com/_data/promis_misc/2020_IJSCR_Author_Disclosure_Form.docx).

Please also make sure that you complete each section of the form.

Page 4

Reviewer #2: This is a paper trying to emphasize the importance of preoperative management in pelvic fracture. Several issues, however are not addressed correctly.

1. The fracture delineated in figure 1 is a subtrochantric fracture and is incorrectly described throughout the paper as femoral neck fracture (including line 11 in case presentation section)

2. Managing subtrochantric fracture in an elderly with high BMI and DM is urgent as these cases have high likelihood of DVT/emboli and early mobilisation of patient and starting DVT prophylaxis as soon as possible is the first priority. In this paper, I did not notice any hint toward the DVT chemoprophylaxis that was used for the patient.
3. Skeletal traction for subtrochantric fracture should be applied with 10% of the patient's weight. In this case, it should be applied with nearly 9- 10 kg weight and only 5 kg that has been used by authors seems to be inadequate.
4. For controlling hyperglycemia in an urgent situation, the blood glucose can be more rapidly controlled by intravenous insulin infusion. In this case, it seems that authors have used subcutaneous insulin that resulted in too prolong time period used for controlling glucose level. Emphasizing on strict glucose control is more relevant for elective procedures including hip arthroplasty.
5. Postoperative imaging would be needed for better understanding.
6. The paper suffers from multiple linguistic tips like "glove shock paresthesia" line 9 case description that should be corrected to "stocking-glove paresthesia".

Title: Perioperative management of closed fracture subtrochanteric femur sinistra in type 2 diabetes mellitus with multiple comorbid: A case report

**International Journal of Surgery Case Reports**

Dear Mr Soelistijo,

I am pleased to inform you that your paper "Perioperative management of closed fracture subtrochanteric femur sinistra in type 2 diabetes mellitus with multiple comorbid: A case report" has been accepted for publication in **International Journal of Surgery Case Reports**.

This journal is fully open access; all articles will be immediately and permanently free for everyone to read and download. To provide Open Access, this journal has a publication fee which needs to be met by the authors or their research funders.

In the next few days, you will be receiving information via email to allow you to choose one of the CC license options, providing funding information and a link to our payment system.

Learn about publishing Open Access in this journal: <http://www.elsevier.com/journals/International-Journal-of-Surgery-Case-Reports/2210-2612/open-access-options>

We appreciate and value your contribution to **International Journal of Surgery Case Reports**. We regularly invite authors of recently published manuscript to participate in the peer review process. If you were not already part of the journal's reviewer pool, you have now been added to it. We look forward to your continued participation in our journal, and we hope you will consider us again for future submissions.

Yours sincerely,

The Editors  
**International Journal of Surgery Case Reports**
