

**THE FACTORS THAT RELATE WITH FERTILE'S COUPLE
MOTIVATION
IN IUD'S CONTRACEPTION DEVICE USAGE**

**Cross Sectional Research at Public Health Center
Sukodadi Lamongan**

ABSTRACT

IUD is effectively contraception device, but on the otherhand especially in fertile's age doesn't have a motivation in IUD's contraception device usage. Thus it needs the effort to increase a motivation to use IUD's contraception device. Base on those statements above the thesis writer takes the research about the factors analysis that relate with PUS motivation in using of IUD's contraception at Public Health Center in special room family of planning. Sukodadi Lamongan. The datas were taken on the 28th Desember, 2002 untill 2th Januari, 2003.

The design of this research is Cross Sectional which the samples were taken from all of the fertile's ages in Sukodadi area that fulfill of inclusion criterion with number of samples 30 respondents. The thesis writer were taken the samples by "purposive sampling" way. The datas collected with quesioner then analyzed by cross tabel between independent and dependent variable. The thesis writer use regression multiple for statistic test with the meaning limited value $p \leq 0,05$.

The conclusion of this research is it's has no relationship between education, economic with couple of fertile's age in using of IUD's contraception. But on the otherhand it has relationship between knowledge and family's supporting with couple fertile's age motivation in using of IUD's contraception.

Keywords : education, economic, knowledge, family supporting, fertile's couple motivation.

ABSTRAK

**FAKTOR-FAKTOR YANG BERHUBUNGAN DENGAN MOTIVASI PUS
TERHADAP PENGGUNAAN KONTRASEPSI IUD****Penelitian Cross Sectional di Puskesmas Sukodadi Lamongan.**

IUD merupakan alat kontrasepsi yang efektif, tetapi kecenderungan pasangan usia subur kurang bermotivasi dalam menggunakan alat kontrasepsi IUD, sehingga diperlukan adanya upaya untuk meningkatkan motivasi dalam menggunakan alat kontrasepsi IUD. Berdasarkan uraian diatas maka peneliti mengadakan penelitian tentang analisis faktor-faktor yang berhubungan dengan motivasi PUS terhadap penggunaan kontrasepsi IUD di Poli KB Puskesmas Sukodadi Lamongan. Pengambilan data dilakukan dari tanggal 28 Desember 2002 sampai 2 Januari 2003.

Desain yang digunakan adalah Cross Sectional. Sampel diambil semua pasangan usia subur yang ada di wilayah Sukodadi dan memenuhi kriteria inklusi dengan jumlah sampel 30 responden. Pengambilan sampel dilakukan dengan cara "Purposive Sampling". Data dikumpulkan dengan menggunakan kuesioner kemudian diolah dengan membuat tabel silang antara variabel independen dan variabel dependen. Uji statistik yang digunakan regresi berganda dengan nilai batas kemaknaan $p \leq 0,05$.

Kesimpulan penelitian adalah tidak ada hubungan antara pendidikan, ekonomi dengan motivasi pasangan usia subur terhadap penggunaan kontrasepsi IUD, sedangkan ada hubungan antara pengetahuan dan dukungan keluarga dengan motivasi pasangan usia subur terhadap penggunaan kontrasepsi IUD.

Kata kunci : Pendidikan, ekonomi, pengetahuan, dukungan keluarga, motivasi PUS.
