

## ABSTRACT

### THE RELATIONSHIP BETWEEN CLINICAL INSTRUCTOR KNOWLEDGE AND IMPLEMENTATION OF CLINICAL TRAINING

Cross Sectional Research at Prof DR W.Z Johannes Hospital Kupang City

By; Yuliana

*Clinical instructor is the effort in order to increase the student professional ability such (intellectual, technical and interpersonal) by the effort of integration in any concepts, theories and nursing principals to fulfill the base client needs in comprehensive way with pra intract phase, introducing phase, working phase, and termination. The performing of clinical training certainly base on knowledge applied in clinical training. Knowledge consider contribute applied in clinical training because it is become the essential domain to decide the behavior of person.*

*The purpose of this study is to analyze the relationship between clinical instructor knowledge level in clinical training and implementation of clinical training at Yohannes Hospital in Kupang City.*

*The design of this research is cross sectional and the population is all clinical instructor who still active. The samples were taken by total sampling way with number of 21 respondent. Data collected by questionnaire and observation . Analysed by sperman rho correlation with the level significant  $p = 0,05$  in SPSS application for windows 11,5*

*The result of this research show that in values and percentages that most respondents which have low knowledge level is 11 (52,4%) and also the implementation of clinical training show in low value i.e 15 (71,4%) with the meaning level  $p=0,033$  it means had relationship significantly between instructor's knowledge level and the implementation of clinical training while also show in correlation value  $(r)=0,466$  means had relation substantially.*

*The result of this research going to recommend to increase the instructor's knowledge by regular training, seminar and the other aspects in order to make base its foundation to perform clinical training especially for students as long as they are doing task in clinic.*
