**Judul:** [JCMPHR] Submission Acknowledgement

Hello,

Nabila Annisa Harum has submitted the manuscript, "Flipchart and Booklet as Media to Increase Cadre's Knowledge About Latent Tuberculosis Prevention in Children" to Journal of Community Medicine and Public Health Research.

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

**Judul:** Hasil Reviewer Naskah JCMPHR

Dear Author,

Bersama ini kami kirimkan hasil review untuk naskah dengan judul **FLIPCHARTAND BOOKLET AS MEDIA TO INCREASE CADRE'S KNOWLEDGE ABOUT LATENT TUBERCULOSISPREVENTION IN CHILDREN**

Mohon ditindaklanjuti sesuai dengan saran reviewer. Kemudian hasil revisi mohon dikirim dengan membalas email ini serta diupload di website [e-journal.unair.ac.id/JCMPHR](https://e-journal.unair.ac.id/JCMPHR) sebelum tanggal **03 Februari 2023**.

untuk tetap melakukan merevisi sesuai dengan saran reviewer serta mengikuti proses selanjutnya seperti copyedit dan proofread hingga publish.

Atas perhatiannya kami sampaikan terima kasih.

Salam

Kind regards,

Managing Editor

## PEER REVIEW FORM

TITLE :

**FLIPCHART AND BOOKLET AS MEDIA TO INCREASE CADRE'S  
KNOWLEDGE ABOUT LATENT TUBERCULOSIS PREVENTION IN  
CHILDREN**

AUTHOR(s) :

NO	REVIEW POINTS*	SUGGESTION
1.	Is the article divided into Introduction, Materials and Methods, Results and Discussion (IMRAD) structure ?	Yes the structure is correct. But in there is a few lack in Introduction, also in Materials and Methods. The introduction seems not focus on the main problem, why that we have to use another method like Flipchart and Booklet compare with another methods? What are the weaknesses of the various existing methods and what are the advantages of Flip Chart and Booklet? Prevalence of the failure of other methods?  And in the Material and Methods the validation of the Flipchart and Booklet Media is not written yet.
2.	Is the article well-written (in English) including the grammar and structure ?	I suggest the grammar and structure should be improved again
3.	Does the abstract provide the context or background for the study and state the study's purpose ?	I don't think so, because the main problem is not stated yet. Why do we have to propose a new method, even though the diagnosis of non-latent TB is still not accurate? I think it is better to rearranged the abstract. You must

		state the Importance of this research.
4.	Does the title represent the whole article content ?	Yes
5.	Does the introduction clearly describe the problem, the scope and purpose of the study ?	Not yet. I already explained in No. 1
6.	Is the stages of the study defined clearly and included statement(s) indicating that the study was approved by a responsible ethical review committee?	Yes.
7.	Are the statistical methods appropriate and sufficiently detailed in such a way that others with access to the data would be able to reproduce the results ?	Yes. It is enough to showed the details
8.	Are the results given appropriately (including in tables or figures) and well-explained in logical sequence in the text, tables, and figures, providing the main or most important findings. No repetition of the data in the tables or figures in the text.	Yes. I think is enough
9.	Does the discussion show clear relationship between the results obtained and the basic concepts or hypothesis ?  Emphasize new and important aspects of the study, statement of the study limitations, and explore the implications of the findings for future research and for clinical practice or policy.	Yes. The discussion showed clear relationship with the results and the basic concepts/hypothesis.  This research has proven the efficacy of using flipcharts and booklets to increase cadres' knowledge about latent TB in a short time, so that it can be used in various health centers, and accelerate early recognition of latent TB in the community.  In theory, there is indeed an increase in knowledge by cadres. but it is better if this research is continued by assessing the

		accuracy of the cadres in carrying out latent TB detection while in the field
10.	Is the conclusion clear and brief, including the link between conclusions with the goals of the study.	Yes.
11.	Does the author provide references to original research sources?	Yes.

Conclusion	Check (v)
• Can be published without correction	
• Can be published with correction	(v)
• Cannot be published
