

## **ABSTRACT**

The purpose of this dissertation is to develop the concept of sustainable forest management in Indonesia which covered: Instruments of law to protect damage in the sustainable forest management, the institutionalization function of the supporting sustainable forest management principles, and the forestry law enforcement from the aspect of administrative and criminal law.

The scope of the study for legal analysis of sustainable forest management aspect from level of jurisprudence that covered: dogmatic of law, and theory of law. The method used in the research is the normative method (Theoretic and positive law aspect), with legal analysis (definition of law forestry, norm of law forestry, and system of law forestry).

The legal analysis to sustainable forest management is one of the instrument to use the law functionally. The regulation law it implemented through Tata Guna Hutan (TGH) activity which is an effort of regulation and forest determination according to its feasibility function.

The institutionalization at intersectoral sustainable forest management were done integrated by using CIS principles (Coordination, intergration, and sincronization) by whom are in charge in the use of forest area.

The enforcement of forestry law in the sustainable forest management is studied from the administrative and criminal law aspect. From the aspect of administrative law, it is regulated by preventive law to protect forest damage through the application of forest management licence, forest management controlling, and the enforcement of administrative sanction. From the aspect of criminal law, the law of forestry enforcement is regulated by repressive law toward the violation of Act Nr. 41 of 1999 Concerning Forestry article 78 Jo article 18 Government Regulation Nr. 28 of 1985 Concerning Forest Protection and the article 40 of Act Nr. 5 of 1990 Concerning Conservation of the Living Resources and their Ecosystems, which implementation was done by legal institutions (Police, Judge, and Prosecutor) with the purpose to protect sustainable forest function and the state rights to the forest.

***Key words : - Legal analysis  
- Sustainable forest management***
