DECLARATION

I declare that this undergraduate thesis submitted in partial fulfillment of the degree of Sarjana Humaniora (S.Hum) of the English Department Faculty of Humanities Universitas Airlangga is entirely my own work and has been solely the result of my own original research. Hereby, I confirm that:

1. This thesis is not copied from any other person's work (published or unpublished);
2. I do not use the services of any professional agencies to produce this thesis;
3. This work has not previously been submitted in whole or in part for a degree or any other qualification either at Universitas Airlangga or elsewhere;
4. Any texts, tables, figures, data or other materials copied from other sources (including, but not limited to, books, papers, and the internet) have been clearly acknowledged and referenced in the text. These details are also confirmed by a fuller references at the end of the work.

I am fully aware that breaching any or all of the above points will result in the withdrawal of the awarded degree and disciplinary action in accordance with the regulations at Universitas Airlangga.

Surabaya, 8 July 2022

Nadhea Jannatul Naima

121811233049

I dedicate this thesis to

my dearest father,
my dearest mother,
and my big family, who always love and support me;

also to everyone
who has been very sweet and generous
for the past 4 years.

Thank you and I love you.

APPROVAL SHEET

Title : The Speech Disorders Uttered by *@thistrippyhipy*
Adult Tourette Syndrome Sufferer

Name : Nadhea Jannatul Naima

Student's Number : 121811233049

Approved to be submitted on 11 July 2022 by:

Advisor

Salimah, S.S., M. Ed.
NIP. 197910062008122001

And has been examined and accepted by the Board of Examiners:

ACKNOWLEDGEMENTS

First and foremost, I would like to express all of my gratitude to Allah SWT for the good health and well-being, so I can complete this undergraduate thesis entitled "The Speech Disorders Uttered by *@thistrippyhippy* Adult Tourette Syndrome Sufferer."

To begin with, I am deeply thankful to my thesis advisor, Salimah, S.S., M. Ed. For always giving me guidance and consultation over a semester towards completing this undergraduate thesis. Thank you for giving meaningful feedback, comments, consultations, and advice on my thesis. I would also like to extend my gratitude to Mrs. Yuni Sari Amalia, S.S., M.A., Ph.D. as my academic advisor, Mrs. Erlita Rusnaningtias, S.S., M.A., Mrs. Dra. Lilla Musyahda, M.Pd., and Mrs. Masitha Achmad Syukri, S.S., M.Hum., and Retno Wulandari S., S.S., M. ITS. as my Thesis Writing Design advisors, and all the lecturers and staff of the English Department of Universitas Airlangga. Thank you for always being wonderfully cooperative.

My grateful appreciation goes to my lovely parents, Bapak Akhmad Sudarma and Ibu Marbiati Rakhmah, also, to my sister Nadhitiana Novariani, for your unending love, support, and prayers. Also, thank you for always believing in me so I could complete my degree. Thank you for being my strongest supporters.

To my cute pets, Rambo and Bong Bong, thank you for always entertaining me when I was in a sad feeling.

Furthermore, I am genuinely thankful to have several close friends who consistently encourage and believe in me. Thank you for always being there for me, Milen, Eka, Santika, Mey, Rensa, Cintassa, Vira, Yuyun, Maya, Anita, Kristy, Lina, Lia, Hilda, and Billa. Also, thank you to all of my English Department Universitas Airlangga batch 2018 fellows for the memorable moments we shared, especially during my college years. I'd also like to thank Mbak Fitri for her additional advices because without her advice, I cannot imagine how struggle I am.

Finally, this undergraduate thesis is far from perfect. However, it is hoped that this research will be valuable to the writer and the reader. Finally, I'd like to thank myself for keeping strong, putting in the effort, and never giving up during difficult times. Thank you very much, Nadhea Jannatul Naima. Thank you for surviving. You are incredible!

The Writer

Fa inna ma'al- 'usri yusrā. Inna ma'al- 'usri yusrā.

So verily, with the hardship, there is relief. Verily, with the hardship, there is relief.

(Q.S Al-Insyirah 5-6)

ABSTRAK

Sebagai manusia, kita perlu berbicara bahasa untuk berkomunikasi satu sama lain. Dalam linguistik, banyak gangguan yang mempengaruhi komunikasi orang dalam bahasa yang diucapkan dan salah satu contohnya adalah gangguan bicara. Namun, ini akan semakin parah jika orang yang memiliki gangguan bicara memiliki beberapa gangguan komorbiditas, misalnya sindrom Tourette. Saat ini, para penderita sindrom Tourette mulai mengekspos diri mereka untuk menjelaskan kesadaran tentang sindrom Tourette di media sosial, misalnya *@thistrippyhippy* atau Evie Meg. Penelitian ini bertujuan untuk mengetahui gangguan bicara yang ditunjukkan oleh *@thistrippyhippy* sebagai penderita sindrom Tourette. Penelitian ini menggunakan metode kualitatif dan teori yang dikemukakan oleh Rosenbaum dan Simon (2016) tentang jenis-jenis gangguan bicara. Hasilnya, ada dua jenis gangguan bicara yang ditemukan dalam sepuluh video yang berhasil diidentifikasi oleh penulis, yaitu gangguan suara dan gagap. Secara total, ada tiga puluh delapan frekuensi jenis gangguan bicara yang diucapkan oleh *@thistrippyhippy*. Penulis menemukan dua puluh dua frekuensi gangguan suara, enam belas frekuensi gagap, dan nol frekuensi gangguan suara bicara. Gangguan suara terutama dialami oleh orang yang memiliki sindrom seperti sindrom Tourette yang dimiliki *@thistrippyhippy* menjadi alasan mengapa *@thistrippyhippy* mengucapkan gangguan suara. Namun gangguan suara bicara merupakan gangguan bicara yang frekuensinya paling sedikit karena usia *@thistrippyhippy* belum sesuai dengan usia anak. Gangguan bunyi bicara banyak terjadi pada usia anak karena bagian mulut anak tidak tumbuh secara ideal. Alasan kedua adalah *@thistrippyhippy* memiliki struktur bagian mulut yang khas, terutama langit-langit mulut sumbing.

Kata Kunci: *@thistrippyhippy*, Gangguan Bicara, Penderita Tourette Syndrome, TikTok

ABSTRACT

As human beings, we need to speak a language to communicate with each other. In linguistics, many disorders affect people's communication within an uttered language and one of the examples is speech disorders. However, it is getting worse if the people who have speech disorders have some comorbidity disorders, for instance, Tourette syndrome. Nowadays, Tourette syndrome sufferers start to expose themselves in order to explain the awareness about Tourette syndrome on social media, for example, *@thistrippyhippy* or Evie Meg. This study aims to find the speech disorders are shown by *@thistrippyhippy* as a Tourette syndrome sufferer. This study used a qualitative method and theory proposed by Rosenbaum and Simon (2016) about the types of speech disorders. As a result, there are two types of speech disorders found in ten videos that had been identified by the writer, which are voice disorder and stuttering. In total, there are thirty-eight frequencies of the types of speech disorder uttered by *@thistrippyhippy*. The writer found twenty-two frequencies of voice disorder, sixteen frequencies of stuttering, and zero frequencies of speech sound disorder. Voice disorder is mainly experienced by the person with the syndrome that *@thistrippyhippy* has, which is Tourette syndrome. However speech sound disorder is the least frequencies of speech disorders because the age of *@thistrippyhippy* has not the child's age. Speech sound disorder mostly happens at the child's age because the mouth part of a child does not grow ideally. The second reason is that *@thistrippyhippy* has a typical structure of the mouth parts, especially the cleft palate.
