ORIGINALITY STATEMENT

I, as stated below:

Name : Nandini Amithya Pramesi Lumaksono
NIM : 011511133215
Study Program : Medicine
Faculty : Medicine
Educational Level : Bachelor (S1)

State that I do not plagiarize in the making of my undergraduate thesis which titled:

MENTAL HEALTH LITERACY IN THE CORRELATION WITH HELP-SEEKING BEHAVIOR AMONG UNIVERSITAS AIRLANGGA'S MEDICAL STUDENTS YEAR 2015-2017

If it is proved that I do plagiarize, I am willing to receive my consequences which have been set from the ethic committee and faculty.

Thus I made this statement in truth.

Surabaya, 4 July 2019

NIM. 011511133215

ACKNOWLEDGEMENTS

First and foremost, I would like to thank God Almighty for giving me strength, knowledge, ability, and opportunity to finish this research study perseverely. Gratitude also given to:

1. Prof. Dr. Soetojo, dr., Sp.U (K) as the Dean of Faculty of Medicine, Airlangga University, for the opportunity to study in Faculty of Medicine, Airlangga University.
2. Dr. Maftuchah Rochmanti, dr., M.Kes. as the study program coordinator in Faculty of Medicine, Airlangga University, for the permission to undertake this research.
3. Dr. Pudji Lestari, dr., M.Kes. as the supervisor for research module and my supervisor 2 for her time and knowledge that supports me in finishing this research.
4. Azimatul Karimah, dr., SpKJ(K), FISCM as my supervisor 1 for her patience and guidance during the making of this research.
5. Erikavitri Yulianti, dr., SpKJ(K) as the examiner for the suggestion and knowledge to improve this research.
6. Prof. Dr. N. Margarita R., dr., Sp.An.KIC as the supervisor of international class for the guidance since my very first semester until now.
7. Atika, S.Si., M.Kes as the statistic and methodology expert for all her direction during the making of this research.

8. All staff from Faculty of Medicine, Airlangga University for the participation in the process of this research's making.
9. The participants who are willing to give their time to support me in the making of this research.
10. Mother, Father, Brother, Grandmother, Aunty and the rest of the family who always pray for me and encourage me constantly so that I can finish this research.
11. Vivi, Aryu, Monic, Meutia and Tommy who receive my special thanks due to their incredible friendship and support.
12. My classmates of CMP 2015 for their warm camaraderie.
13. Anyone who have been supporting me in the making of this research.

Hopefully, the result of this research can be beneficial and useful for many people. Suggestion and criticism from the readers are highly expected.

MENTAL HEALTH LITERACY IN THE CORRELATION WITH HELP-SEEKING BEHAVIOR AMONG UNIVERSITAS AIRLANGGA'S MEDICAL STUDENTS YEAR 2015-2017

ABSTRACT

Background: Medical students are hesitant to seek appropriate help for their mental health problems. Some of the students are already in a crisis when they finally decide to find help. Mental health literacy is a suitable for early identification of mental disorders, decreasing stigma towards people with mental disorders or seeking help, and improving help-seeking behavior.

Purpose: To determine the influence of mental health literacy to help-seeking behavior and to describe mental health literacy and help-seeking behavior of the medical students.

Methods: This study is an observational analytical study. The participants were asked to fill in demographic characteristics questionnaire before they answer MHLS and ATSPPH-SF via online file sharing platform. Logistic regression was used to measure the influence of mental health literacy to help-seeking behavior.

Results: Sixty respondents were included. There were no difference of the literacy and attitudes across the admission years. Generally, the students showed good literacy and attitude. Only some attributes of the MHLS has lower scores such as self-treatments, confidentiality, social distance, and reliance on self. There was no influence of being literate in the total score of MHLS to having good attitude in ATSPPH-SF (p-value=0.303). Only by being literate in attribute 6 of the MHLS the students showed good attitude in ATSPPH-SF (p-value=0.027).

Conclusion: There was no influence of mental health literacy to help-seeking behavior.

Keywords: Mental Health Literacy, Help Seeking Behavior, Attitudes Toward Seeking Professional Help, Medical Students
