1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$ defined by

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

where

$$a_n = \begin{cases} 1 & \text{if } n \text{ is even} \\ 0 & \text{if } n \text{ is odd} \end{cases}$$

and

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{k=0}^{\infty} \frac{1}{(2k)!} x^{2k}$$

is

$$f(x) = \cosh(x)$$

2. The second part of the paper is devoted to the study of the

properties of the function
