Key Words : Planning, Implementation, Evaluation and Obstacle.

## ABSTRAK

Sebagai salah satu indikator keberhasilan program penanggulangan TBC, angka cakupan penderita TBC BTA positif baru hendaknya dapat dipenuhi. Dipuskesmas wilayah Dinas Kesehatan Kabupaten Tuban selama 3 tahun berturut-turut belum dapat memenuhi angka tersebut. Tujuan penelitian ini adalah menganalisis program penanggulangan TBC dipuskesmas wilayah Dinas Kesehatan Kabupaten Tuban.

Penelitian ini merupakan penelitian observasional deskriptif. Populasi didalam penelitian ini adalah petugas pengelola program penanggulangan TBC di puskesmas wilayah Dinas Kesehatan Kabupaten Tuban. Diambil secara total sampling, yaitu 32 orang. Data yang diperoleh, dianalisis secara deskriptif dalam bentuk tabel dan narasi.

Hasil penelitian menunjukkan bahwa perencanaan program penanggulangan TBC adalah baik, dengan skor komposit 0,814. Pelaksanaan program penanggulangan TBC adalah kurang, dengan skor komposit 0,638. Koordinasi program penanggulangan TBC adalah baik, dengan skor komposit 0,948. Supervisi didalam program penanggulangan TBC adalah cukup, dengan skor komposit 0,795. *Monitoring* program penanggulangan TBC adalah cukup, dengan skor komposit 0,794. Dan evaluasi didalam program penanggulangan TBC adalah baik dengan skor komposit 0,862. Sedangkan hambatan didalam program penanggulangan TBC dari yang prioritas adalah dana, kurangnya koordinasi dari lintas sektor, tenaga dan waktu.

Disimpulkan bahwa kaitan antara perencanaan, pelaksanaan, koordinasi, supervisi, *monitoring* dan evaluasi yang baik, akan dihasilkan cakupan penderita TBC yang tinggi pula. Dan disarankan agar dilaksanakan pelatihan petugas, penambahan dana, peningkatan kerjasama lintas sektor dan penilaian kinerja petugas.

Kata Kunci : Perencanaan, Pelaksanaan, Evaluasi dan Hambatan.
