

PT Pelindo III Tanjung Perak is a State Owned Enterprises (SOEs) which served in sea transport sector. PT Pelindo III Tanjung Perak is given the responsibility to control, regulate, and provide information on maritime traffic. The founding of PT Pelindo III Tanjung Perak is expected to promote the economy of trade, tourism, and transport. PT Pelindo III Tanjung Perak has given the information such as maritime information, shipping information schedule, company information activities, and etc. Those information are submitted by Public Relations Department of PT Pelindo III Tanjung Perak.

The Public Relations Department is one of the most important parts in a company. The Department gives important information to the company. The Public Relations Department serves to controlling, making plans, communicating, and keeping the good image of the company by giving good news to the press media. PT Pelindo III Tanjung Perak Branch Surabaya as a company, has been trusted to maintain the relationships with partners and communities, so that the company will have consistent work.

It was a valuable opportunity for the writer to do an internship in PT Pelindo III Tanjung Perak, especially in Public Relations Department. During the internship in Public Relation Department the writer received many tasks. The tasks include: news clippings about port, making a documentation, book

classifications, books inventory, welcoming company visits, made critical and suggestion board. There was an obstacle when the writer did the intership; when the writer was given an assignment to interview foreigners from Sweden, it was hard for the writer to understand the foreigners' pronunciation and speed of talking. It was both a lesson and an experience for the writer to understand more about the pronunciation of every foreigner the writer met and to add the writer's knowledge of vocabulary. The writer was very happy when she was doing the internship, because she could explore the lessons which she had recieved from the study. Hopefully the writer can use her experience after she graduates especially when she gets a job.
