

### **ABSTRACT**

This research purposed to know as long as the role province of east Java for making empowermentthe society of land owner Suramadu bridge. The research uses the qualitative descriptive approach by informan form the land owners,connection agency department,some acdemics,practice of society.

The result of research appoints that has government role for making empowerment, it doesn't touch on truly essencial of frame empowerment,is to make awareness,the large and open public appreciation scope. The process of empowerment that only by giving many compensation aids consist of money etc. Truly increase more weakness condition for improvement of human resource (SDM) on development.

Many ways that was done by government beginning by giving many compensation aids,relocation of land and project worker recruitment,actually it won't develop the awareness of society in development. Even, it made the addictif condition from society but that must remain to be admitted as prgressive initiative of province east Java government on incrasing social walfare.

Key word : Empowerment, East Java Governmenet, Qualitative research,Society and Social walfare.
