ABSTRACT

THE COMBINATION OF THE TRIAD MODELS EXPECTED TO BE THE BEST MODEL IN DEVELOPING OF AGRICULTURE TRAINING MODEL AT JEMBRANA REGENCY

BY I KETUT ERAWATI

The objective research was to develope training model that used in upgrading profesionalism in giving information about agriculture at Jembrana regency. The training program itself was proposed to overcome the problem faced in agricultural development. The information is really important to develop agriculture at our regency that used to increase profesionalism technically carried out in agricultural training program. The training program that already applied couldn't help what actually need. The solution needed is how we get appropriate training program to solve this program.

The research application methodologically surveyed based on identification and analyze of the training program that had already done and theorically examined. The result showed that the achievement of the training model didn't get along with what we expect. This research we knowed that we should give priority to the training model needed by agriculturel informant.

Key words: Profesional, the human resourses, upgraded and trained.
