EDUCATION AND TECHNICAL TRAINING OF ANIMAL HUSBANDRY THAT BASED ON THE COMPETENCE IN LIVESTOCK SEEDLING ASSOCIATION AND LIVESTOCK FOOD VERDANT (BPT and HMT) AT ANIMAL HUSBANDRY DEPARTMENT IN EAST JAVA PROVINCE

MUHAMMAD AFTABUDDIN RIJALUZZAMAN

The purpose of this research is making a Model of Education and Technical Training that Based on Competence in Livestock Seedling Association and Livestock Food Verdant (BPT and HMT) at Animal Husbandry in East Java Province. Model of this Education and Technical Training is aimed to answer the problem that related with the existence animal husbandry's education and technical training. This information is really important, in order to fasten BPT and HMT development to become an independent and professional government installation. The Model of animal husbandry's education and technical training is the combination of the existence education and technical training, and animal husbandry's education and technical training that being wanted, and it is combined with the theory of education and training.

In its implementation, this research is using survey method to identify and analyze the existence education and training and model of education and technical training that being wanted, that received from respondent's statement that has been combined with theory.

The result of this research shows that the model of animal husbandry's education and technical training that being wanted by respondents has several similarities with basic theory of education and training. It includes Analysis of Education and Training Need, the Implementation of Education and Training (material, method, trainer, media, time) and the Evaluation of Education and Training Program. Therefore, the model of animal husbandry's education and technical training that based on this competence, may become the priority to be implement in the implementation of animal husbandry's education and technical training in BPT and HMT at Animal Husbandry Department in East Java Province.
