JUDUL:

***INDIRECT EXCHANGE RATE PASS-THROUGH EFFECT TERHADAP EKSPOR TEKSTIL DAN PRODUK TEKSTIL (TPT) DI INDONESIA TAHUN 2005-2010***

ISI:

Sebagai komoditi pemenuh kebutuhan sandang, komoditi Tekstil dan Produk Tekstil (TPT) memiliki produksi yang besar, tetapi 85 persen bahan baku tekstil Indonesia berasal dari impor. Pergerakan *kurs* rupiah mendorong terjadinya fluktuasi harga bahan baku impor, yang berdampak pada penetapan biaya produksi perusahaan tekstil, dan pada akhirnya akan menjadi harga ekspor tekstil. Pengaruh *indirect exchange rate pass-through* terhadap nilai ekspor tekstil periode 2005.1-2010.12 diteliti menggunakan metode *vector error correction model* (VECM) untuk mengetahui hubungan jangka pendek dan jangka panjang antara nilai ekspor tekstil, nilai tukar riil rupiah terhadap dolar, biaya produksi perusahaan, dan volatilitas nilai tukar nominal. Hasil penelitian menunjukkan bahwa nilai tukar riil, dan volatilitas nilai tukar berpengaruh secara signifikan terhadap nilai ekspor tekstil. Hal ini menunjukkan terjadi hubungan antara masing-masing variabel. Dalam jangka panjang elastisitas transmisi nilai tukar riil menunjukkan nilai 1,451693, dan volatilitas menunjukkan nilai sebesar 0,184229.

Kata Kunci: ekspor TPT, volatilitas nilai tukar, nilai tukar riil, biaya produksi

SUBJEK/OBJEK PENELITIAN : Ekspor Tekstil dan Produk Tekstil  
DAERAH PENELITIAN : Negara Indonesia

THEME:

***INDIRECT EXCHANGE RATE PASS-THROUGH TO EXPORT VALUE OF  
TEXTILE AND TEXTILE PRODUCT IN INDONESIA ON YEAR 2005-2010***

CONTENTS:

*As a fulfilling the clothing needs, Textile and Textile Product has a major textile production, but 85 percent of input or basic textile materials were imported. Domestic kurs movement can affects the fluctuation in the price of basic materials import, this may impact on production cost of textile company, who will eventually become textile export prices. The indirect effect of exchange rate pass-through to value of textile export on year 2005.1-2010.12 was examined using vector error correction model (VECM), to understanding the short and long-run relationship between value textile export, domestic real exchange rate, production cost, and exchange rate volatility. The result of this study shows that real exchange rate, and exchange rate volatility significantly affected the value of textile export. This means there was correlation among variables. In long-run, the elasticity of transmittion the real exchange rate shows value of 1,451693, and exchange rate volatility shows value of 0,184229.*

*Key Words: textile export, exchange rate volatility, real exchange rate,  
production cost*

RESEARCH SUBJECT/OBJECT : *Textille Export*  
RESEARCH REGION : *Indonesia*
