ABSTRACT

Gendarusin A is a major component of *Gendarussa vulgaris* Ness. This component has structure 6,8 – di- α -L-arabinopiranosil-4',5,7,trihidroksi-flavon and has antifertility effect by decrease hyaluronidase enzyme of mouse sperm. In this research gendarusin A assay was done with HPLC method. From methods validation get the result selectivity factor (α) in ethanol fraction is 1,751 and in water phase is 1,202. And Rs gendarusin A in ethanol fraction is 1,221 and in water phase is 1,378. The Limit of Quantitation (LOQ) is 0,4636 $\mu\text{g/ml}$. The linear regression equation is $Y = 14285,1022x - 119275,4160$ and the correlation coefficient is 0,9970. In accuracy test, the recovery % in ethanol fraction is 91,65% and in water phase is 84,86%. In precision test, the RSD (Relative Standard Deviation) is 5,72%. Gendarusin A assay in ethanol fraction is 2,02% w/w and in water phase is 0,19% w/w.

Key words: gendarusin A, assay, water phase, ethanol fraction, HPLC
