ABSTRACT

Hypertension is one of cardiovascular diseases that can cause morbidity and mortality. It covers 31.7% of people with hypertension in Indonesia. Hypertension can cause changes in the anatomy and/or function of the heart, that may danger people's life. The changes itselves can be diagnosed with electrocardiography (ECG), the most common used and non-invasive device. Based on that background, the objective of this study is to recognize the ECG profile of hypertension patients in Cardiology Outpatient Clinic RSUD Dr. Soetomo Surabaya within the period of 1st until 31st March 2015. The design of this study was observational descriptive study. The samples were obtained through primary and secondary data from patients' medical history from patients within the period of 1st until 31st March 2015 between 11.30 AM – 02.00 PM GMT7+ (west Indonesia time zone). There were 140 hypertension patients throughout this study period. Two ECG results showed left ventricular hypertrophy and 138 ECG results showed other than left ventricular hypertrophy, such as arrhythmia and atrial fibrillation. The prevalence of hypertension was the same between men and women. The highest prevalency of hypertension was in age 51 to 60. There were two left ventricular hypertrophy ECG results found, both were in men, 55th and 61st years old. The spesific thing found in both ECG results that shows left ventricular hypertrophy is the sum of S wave in V1 lead and R wave in V5/V6 (choose the higher) is more than 35 mm.

Keyword: *hypertension, ECG, left ventricular hypertrophy*

DAFTAR SINGKATAN xix

BAB 1 PENDAHULUAN 1

1.1 Latar Belakang 1

1.2 Rumusan Masalah 4

1.3 Tujuan Penelitian 4

1.3.1 Tujuan umum 4

1.3.2 Tujuan khusus 5

1.4 Manfaat Penelitian 5

1.4.1 Pasien 5

1.4.2 Pengembangan ilmu 5

1.4.3 Pelayanan kesehatan 5

1.5 Risiko Penelitian 6

BAB 2 TINJAUAN PUSTAKA 7

2.1 Jantung 7

2.1.1 Anatomi jantung 7

2.1.2 Atrium kanan 9

2.1.3 Atrium kiri 10

2.1.4 Ventrikel kanan 10

2.1.5 Ventrikel kiri 11

2.1.6 Sistem konduksi jantung 12

2.1.6.1 Nodus Sinoatrial 12

2.1.6.2 Nodus Atrioventrikular 13

2.1.6.3 Sistem His-Purkinje 13

2.1.6.4 Alur sistem konduksi 14

2.2 Hipertensi 15

2.2.1 Hipertrofi ventrikel kiri pada hipertensi 18

2.3 Elektrokardiogram 18

2.3.1 Gambaran EKG normal 24

2.3.2 Gambaran EKG hipertrofi ventrikel kiri 27

BAB 3 KERANGKA KONSEPTUAL 29

3.1 Kerangka Konseptual 29

3.2 Penjelasan Kerangka Konseptual 29

BAB 4 METODE PENELITIAN 31

4.1 Jenis dan Rancangan Penelitian 31

4.1.1 Jenis penelitian 31

4.1.2 Rancangan penelitian 31

4.2 Populasi, Besar Sampel, dan Teknik Pengambilan Sampel 31

4.2.1 Populasi 31

4.2.2 Besar sampel 31

4.2.3 Teknik pengambilan sampel 31

4.3 Variabel dan Definisi Operasional Variabel Penelitian 32

4.3.1 Variabel penelitian 32

4.3.2 Definisi operasional variabel penelitian 33

4.3.2.1 Gambaran EKG 33

4.3.2.2 Riwayat hipertensi 33

4.4 Teknik Pengumpulan Data 33

4.5 Instrumen Penelitian 33

4.6 Lokasi dan Waktu Penelitian 34

4.7 Alur Kerja 34

4.8 Monitoring Keamanan Pasien 34

4.9 Pengumpulan, Pengolahan, dan Analisis Data 35

BAB V HASIL PENELITIAN 36

5.1 Karakteristik umum 36

5.2 Distribusi gambaran EKG hipertrofi ventrikel kiri pasien hipertensi 37

5.3 Distribusi riwayat diketahuinya hipertensi pasien hipertensi 38

BAB VI PEMBAHASAN 40

6.1 Karakteristik Umum 40

6.2 Distribusi Gambaran EKG Hipertrofi Ventrikel Kiri Pasien Hipertensi 43

6.3 Distribusi Riwayat Diketahuinya Hipertensi Pasien Hipertensi 45

6.4 Keterbatasan Penelitian 46

BAB VII PENUTUP 47

7.1 Kesimpulan 47

7.2 Saran 47
