Dear Dr Ekasari,

Your submission entitled "Determination The Effective Dosage of Ethanol Extract from Cassia spectabilis Leaves as An Antimalarial In Mice Infected-Plasmodium berghei" has been assigned the following manuscript number: AJID-D-17-00034.

You will be able to check on the progress of your paper by logging on to Editorial Manager as an author.

The URL is <http://ajid.edmgr.com/>.

Thank you for submitting your work to this journal.

Kind regards,

African Journal of Infectious Diseases

Dear Dr Ekasari,

Reviewers have now commented on your paper. You will see that they are advising that you revise your manuscript. If you are prepared to undertake the work required, I would be pleased to reconsider my decision.

For your guidance, reviewers' comments are appended below.

If you decide to revise the work, please submit a list of changes or a rebuttal against each point which is being raised when you submit the revised manuscript.

Your revision is due by Aug 01, 2017.

To submit a revision, go to <http://ajid.edmgr.com/> and log in as an author. You will see a menu item call Submission Needing Revision. You will find your submission record there.

Yours sincerely

Maria Inge Lusida, M.D., Ph.D.

Specialist Editor

African Journal of Infectious Diseases

Reviewers' comments:

Reviewer #1: The content of this article is interesting and important. However, the writing is not acceptable due to so many grammatical errors. Please consult a native speaker for the revision.

Reviewer #2: The authors should make revision for grammar writing/ grammar sentences and some spelling.

Abstract

Background: The preliminary study on antimalarial activity of the ethanol extract of *Cassia spectabilis* leaves against *Plasmodium berghei* has been carried out by *in vivo* experiment. It was demonstrated that ethanol extract of *C. spectabilis* leaves could inhibit growth of rodent malaria parasite *P. berghei* by 59.29 % (at a dose of 100 mg/kg bodyweight). However, further investigation is required to determine an effective dose of the administered extract for a higher inhibitory effect and increasing effectiveness of the extract.

Material and Methods: To determine the effective dose of ethanol extract of *C. spectabilis* leaves, a "4-day
