To: drug delivery <ijddtjournal@gmail.com>

Dear Editor,

We would like to ask about progress of our manuscript in IJDDT Volume 8 Issue 2, Article 1 after revision, when it will be published online? Since now is Mid July 2018, we have not seen yet in the website. The title is "Partition Coefficient and Glutathione Penetration of Topical Antiaging:Preformulation Study" with authors; Fitria Nugrahaeni, Dewi Melani Hariyadi, Noorma Rosita (Noorma Rosita as corresponding author: [itanr@yahoo.com](mailto:itanr@yahoo.com)).

Thank you.

Kind Regards,  
Dewi Melani Hariyadi, PhD,Apt.

## Fwd: 2017 Manuscript Submission

Dear author

Your manuscript number "10252017DDTB" bearing with title "

Partition Coefficient and Glutathione Penetration of Topical Antiaging: Preformulation Study

" has been provisionally accepted after minor modifications. It may be published in the  
upcoming issue of the journal subject to deposition of Open Access Fee USD150

The authors are required to use the **paypal link** available at this link [www.ijddt.com/fee](http://www.ijddt.com/fee). Other  
modes are not acceptable.

**Note:** The authors may **reply this mail** with modified manuscript containing minor  
typography errors if left coincidentally during submission. The errors must be highlighted clearly  
in **red color font**. The modifications are subject to approval of editorial board. Any  
typological/coincidental error left after this stage will not be considered. In case the  
modifications are not minor, then authors may be asked to withdraw and resubmit manuscript.

**Important: After making a transaction, please confirm transaction by providing  
transaction details as a reply to this mail only.**

**5. Title of Manuscript**

Partition Coefficient and Glutathione Penetration of Topical Antiaging: Preformulation Study

**6. Abstract**

Glutathione (GSH) is a broad antioxidant of the thiol-tripeptide group, highly hydrophilic, which has limitation for topical preparations. A lipophilic surfactant is an alternative method to enhance the glutathione partition. The purpose of this study was to determine the apparent partition coefficient (APC log) of glutathione; glutathione with additional surfactant at different HLB value of HLB 4.3; 5.5; 7; 11 and selected HLB was studied for penetration. The study was conducted by dissolving glutathione in water plus various HLB surfactants. Determination method of partition coefficient was done by shake flash method. The penetration test was conducted using the parameter of decreasing Matrix Metalloproteinase-1 expression on the balb-c male skin. The results can be used as a reference for topical glutathione formulations as these results are preformulation study.

**7. Keywords (2-10)**

glutathione, coefficient of partition, HLB value, surfactant, penetration, matrix metalloproteinase-1

**8. Complete manuscript in one file (word)**
