5. Title of Manuscript

CHARACTERIZATION AND RELEASE OF IBUPROFEN IN PRONIOSOME SYSTEM (IBUPROFEN-SPAN 60-CHOLESTEROL)

6. Abstract

The aim of this research was to determine influence of proniosome system which consists of ibuprofen-span 60-cholesterol with molar ratio of 2:1:0,75. The proniosome system was made by Coacervation Phase Separation Method, using ethanol 96% as solvent and glycerol 0,1% as aqueous phase. There were two formulas in this research formula I was ibuprofen non proniosome in HPMC gel base and formula II was ibuprofen proniosome in HPMC gel base. Characterization of formulas included organoleptic and pH of ibuprofen gel. Drug release was determined using diffusion cell and cellophane membrane in phosphate buffer pH $6,0 \pm 0,05$ at temperature $32 \pm 0,5^{\circ}\text{C}$ for 8 hours. The drug release (flux) of ibuprofen from formula I and II were $28,3067 \pm 3,0852 \mu\text{g}/\text{cm}^2/\text{min}^{1/2}$ and $23,1900 \pm 1,7658 \mu\text{g}/\text{cm}^2/\text{min}^{1/2}$, respectively. The statistical result using independent sample T-test on degree of confident of 95% ($\alpha = 0,05$) concluded that there was significant value of their fluxes. Research result revealed that release of ibuprofen proniosome system was lower than ibuprofen nonproniosome system in HPMC 4000 gel base.

7. Keywords (2-10)

proniosome, ibuprofen, drug release

8. Complete manuscript in one file (word)

Dear Author,

The manuscript is already under acceptance mode, the problem is reference pattern. You can reply this mail with modified references as per instructions or view any published article

Dear author

Your manuscript number " 12052017DDTH " bearing with title "

CHARACTERIZATION AND RELEASE OF IBUPROFEN IN PRONIOSOME SYSTEM (IBUPROFEN-SPAN 60-CHOLESTEROL)

" has been provisionally accepted after minor modifications. It may be published in the upcoming issue of the journal subject to deposition of Open Access Fee USD150

The authors are required to use the **paypal link** available at this link www.ijddt.com/fee. Other modes are not acceptable.

Note: The authors may **reply this mail** with modified manuscript containing minor typography errors if left coincidentally during submission. The errors must be highlighted clearly in **red color font**. The modifications are subject to approval of editorial board. Any typological/coincidental error left after this stage will not be considered. In case the modifications are not minor, then authors may be asked to withdraw and resubmit manuscript.

Important: After making a transaction, please confirm transaction by providing transaction details as a reply to this mail only.
