

ABSTRAK

Penelitian ini bertujuan untuk menganalisis pengaruh *perceived colleagues' safety knowledge/behavior* terhadap *safety outcome* pada Rescuer Badan Nasional Pencarian dan Pertolongan Surabaya dengan *safety behavior* sebagai variabel intervening. Penelitian ini dilakukan pada Rescuer dengan sampel 87 orang. Teknik analisis yang digunakan adalah analisis jalur. Variabel independen dalam penelitian ini adalah *perceived colleagues' safety knowledge/behavior* (X), *safety behavior* sebagai variabel intervening (Z), dan *safety outcome* sebagai variabel dependen (Y).

Hasil dari penelitian ini menunjukkan bahwa *safety behavior* memediasi hubungan antara *perceived colleagues' safety behavior/knowledge* dan *safety outcome*.

Kata Kunci : *perceived colleagues' safety knowledge/behavior (PCSK/B)*, *safety behavior*, *safety outcome*

ABSTRACT

This study aims to analyze the effect of perceived colleagues' safety knowledge/behavior on safety outcome at Rescuer of “Badan Nasional Pencarian dan Pertolongan” with safety behavior as intervening variable. The research was conducted on Rescuer with a sample of 87 persons. The analysis technique used is a path analysis. The independent variable in this research is the perceived colleagues' safety knowledge/behavior (X), is the intervening variable safety behavior (Z), and the dependent variable is safety outcome (Y).

The results of this study indicate that safety behavior mediates the relationship of perceived colleagues' safety behavior / knowledge and safety outcome.

Keywords: perceived colleagues' safety knowledge/behavior (PSCK / B), safety behavior, safety outcome
