**TITLE:**

Determination of Being an Investor in the Islamic Capital Market

**CONTENT :**

This study aims at determining the dominant factors influencing beginner investors in investing in the Islamic capital market. The study was conducted on East Java people joined a workshop on sharia capital market investors. The seminar was held at Santika Premiere Gubeng Hotel Surabaya and it involved 88 people from East Java by presenting speakers of the Head of Islamic Capital Market Institutional Relations and Information Section, Islamic stock investors, and Investment Managers.

The results of the research obtained from respondents indicated that the respondents' answers are seemingly to be homogeneous with the highest dominant factor, namely the classic factor followed by financial literacy and awareness, personal financial needs, psychological influences, religiosity.

**Keywords: Sharia Capital Market, Investment in Islamic Perspective, Sharia Investment.**
