

ABSTRACT

This research purpose was to obtain empiric evidence about the quality and the facilities that affect the Economic Faculty students achievements in private colleges throughout Daerah Istimewa Yogyakarta. This research also meant to satisfy the curiosity about any studying quality differences that might exist among Economic Faculty students in relationship with the quality and facilities of private colleges throughout Daerah Istimewa Yogyakarta.

Sample's collecting use proportional stratified random sampling technique. Research's respondents were the Economic Faculty students (both male and female students) majoring Management in 1996:1997 academic year of 6 private colleges throughout Daerah Istimewa Yogyakarta with equal status received in 1996, which were Universitas Islam Indonesia, Universitas Janabadra, Universitas Proklamasi 45, Universitas Atmajaya Yogyakarta, Universitas Muhammadiyah Yogyakarta, and Universitas Pembangunan Nasional "Veteran" Yogyakarta. The data-collecting questionnaire consisted 23 questions and it had past validity and reliability test.

The analyzing method we used was in the form of double linear regression. Hypothesis test was using the F test, t test and one-way variation analyst test, with 5% obvious strata.

Research's result show that ability in finishing the task given, competence in thinking, and academic motivation all together have a great influence on the private colleges Economic Faculty students achievements throughout Daerah Istimewa Yogyakarta, proven by the F ratio : 70.45759 with F significance 0.0000. the most dominant variable is the academic motivation by Beta = 0.304035 or 30.4035%. the one-way variation analysis test prove the differences existence of Economic Faculty students achievements based on abilities in finishing their tasks, the competence in thinking, and the academic motivation among private colleges throughout Daerah Istimewa Yogyakarta, the results are shown below :

41.1551 > 0.0000 ; 33.2562 > 0.0000 and 43.9859 > 0.0000.

The advantage of this research is by obtaining scientific information on the quality and facility of studying influences on students achievements of private colleges Economic Faculties could be established a better and appointed strategy in order to generally enhance students achievements on private colleges.
