

Lailisa, Elma. 2020. **Prosedur dan Tindakan Karantina Memasukkan Sapi Bakalan dari Australia Menuju Indonesia di Balai Besar Karantina Pertanian Tanjung Priok**. Tugas akhir ini dibawah bimbingan Agung Budianto Achmad, drh., M.Si. Program Studi Diploma-III Paramedik Veteriner, Departemen Kesehatan, Fakultas Vokasi, Universitas Airlangga, Surabaya.

ABSTRAK

Era globalisasi memberikan dampak terhadap perdagangan internasional yang menyebabkan arus lalu lintas hewan meningkat sehingga risiko masuknya Hama dan Penyakit Hewan Karantina juga semakin tinggi. Pengamatan ini bertujuan untuk mengetahui prosedur dan tindakan karantina yang dilakukan dalam kegiatan memasukkan sapi bakalan dari Australia menuju Indonesia di Balai Besar Karantina Pertanian Tanjung Priok. Dalam pengamatan ini dilakukan pengambilan data primer dan sekunder melalui kegiatan observasi dan wawancara secara langsung di pelabuhan maupun kantor induk BBKP Tanjung Priok. Hasil pengamatan menunjukkan bahwa sapi bakalan yang masuk telah melalui prosedur dan tindakan karantina sesuai dengan peraturan perundang-undangan yang berlaku sehingga dapat dipastikan hewan yang dilalulintaskan dalam keadaan sehat dan aman.

Kata kunci: karantina, prosedur, tindakan, sapi bakalan.

Lailisa, Elma. 2020. **Quarantine Procedures and Actions for Feeder Cattle from Australia to Indonesia at the Agricultural Quarantine Tanjung Priok.** This final project under the guidance of Agung Budianto Achmad, drh., M.Si. Study Program Diploma-III Paramedic Veteriner, Department of Health, Vocational Faculty, Airlangga University, Surabaya.

ABSTRACT

The era of globalization has an impact on international trade that causes the flow of animal traffic to increase. So the risk of entry of Quarantine Pests and Animal Disease is also higher. The observation aims to determine the quarantine procedures and actions carried out in the activity of entering cattle from Australia to Indonesia at the Agricultural Quarantine Tanjung Priok. In this observation, primary and secondary data collection by carried out through direct observation and interviews at the port and the Agricultural Quarantine Tanjung Priok main office. Observation results indicate that feeder cattle that have entered through quarantine procedures and actions are following the applicable laws and regulations so it can ascertain that the animals passed were healthy and safe.

Keywords: quarantine, procedure, action, feeder cattle.
